Instrumentation and Research Programmes for Small Telescopes J.B. Hearnshaw, P.L. Cottrell, 2012-12-06 This volume is the proceedings of IAU Symposium No 118 on Instrumentation and Research Programmes for Small Telescopes where small telescopes were defined as those ground based instruments with apertures less than 1.5m The scientific goal of the symposium was to emphasise research programmes which were more suited to smaller telescopes on which frequent regular observations can be made A wide variety of topics on instrumentation photometry spectroscopy and polarimetry of objects in the solar system to extragalactic systems were discussed Each of the four scientific days of the symposium comprised a number of invited review papers contributed oral papers and discussion sessions devoted purely to the large number 4 of poster papers An introductory paper on the research potential of small telescopes sets the scene for the symposium The proceedings have then been divided into three sections Section I Telescopes and instrumentation Section II Photometric research programmes Section III Spectroscopic research programmes The diversity of topics within each of these sections indicated the extent to which small telescopes have and can contribute greatly to astronomical research Dr J A Graham's summary of the symposium which illustrates the opportunities available with small telescopes concludes these proceedings As in all symposia the importance of the discussion following each paper was realised The discussion was recorded on tape and wherever possible on questions and answer sheets transcribed and then edited

Investing in Commodities Patrick Maul, 2011-03-29 Inhaltsangabe Introduction Commodities and especially investments in commodities are currently enjoying a high degree of attention by institutional investors such as pension funds and portfolio managers but an increasing interest in commodities can also be found at retail investors Unlike bonds stocks mutual and exchange traded funds commodities are real tangible products and part of people's everyday life Even though commodities are essential for our survival recently commodities as an asset class were part of excessive media coverage investments in that asset class has become interesting for private investors In this Bachelor Thesis I give insight into the commodity sector as an investment opportunity especially for private investors in Germany I will refrain from presenting the historical development of the physical commodity market but this work shows the facts about the six most important opportunities provided in the financial market to participate in the development in as Jim Rogers describes it the world's best market Price development of selected commodities in 2009 The previously mentioned excessive media coverage is the consequence of apparently infinite price increases of the much noticed commodities gold and crude oil The spot price for gold for example has reached a new all time high in November 2009 with over 1100 USD oz and a price increase of 50% in 12 months The spot price for Brent crude oil has approximately doubled in the same period of time from around 38 USD bbl at the end of December 2008 to 78 USD bbl in November 2009 Therewith the spot price for one barrel of Brent crude oil has only reached 50% of its peak price on 7th of June 2008 Back then crude oil cost 145.16 USD bbl Such performances and prospects for further price increases arouse interest in the mass market and move commodity investments into the focus of all kind of investors Indeed investment in the asset class commodities has always been profitable for investors as they have usually achieved a higher rate of return in the past as well as in the year 2009 compared to benchmark investments like the German index of leading shares DAX see Table A Spot prices for Gold Crude Oil vs Benchmark DAX from Nov 2008 Nov 2009 At the same time commodity investments have been underrepresented in most portfolios of private investors What happened before 2009 Before the outbreak of the financial crisis in 2008 the increasing demand
