procedures named after the basic graph types they produced The graphics code was roughly one and a half megabytes in size In the early 1990s I redesigned the SYSTAT graphics package using object based technology I intended to produce a more comprehensive and dynamic package I accomplished this by embedding graphical elements in a tree structure Rendering graphics was done by walking the tree and editing worked by adding and deleting nodes The code size fell to under a megabyte In the late 1990s I collaborated with Dan Rope at the Bureau of Labor Statistics and Dan Carr at George Mason University to produce a graphics production library called GPL this time in Java Our goal was to develop graphics components This book was nourished by that project So far the GPL code size is under half a megabyte
