Literary History of Modern China looks beyond state sanctioned works and official narratives to reveal China as it has seldom been seen before through a rich spectrum of writings covering Chinese literature from the late seventeenth century to the present. Featuring over 140 Chinese and non Chinese contributors from throughout the world, this landmark volume explores unconventional forms as well as traditional genres: pop song lyrics and presidential speeches, political treatises and prison house jottings, to name just a few. Major figures such as Lu Xun, Shen Congwen, Eileen Chang and Mo Yan appear in a new light, while lesser known works illuminate turning points in recent history with unexpected clarity and force. Many essays emphasize Chinese authors' influence on foreign writers as well as China's receptivity to outside literary influences. Contemporary works that engage with ethnic minorities and environmental issues take their place in the critical discussion alongside writers who embraced Chinese traditions and others who resisted. Writers' assessments of the popularity of translated foreign language classics and avant garde subjects refute the notion of China as an insular and inward looking culture. A vibrant collection of contrasting voices and points of view, *A New Literary History of Modern China* is essential reading for anyone seeking a deeper understanding of China's literary and cultural legacy.

Sophie's Diary: A Mathematical Novel Dora Musielak, 2012-05-24 The French mathematician Sophie Germain was the first woman in the history of mathematics to make a substantial contribution to the proof of Fermat's Last Theorem. Much published research about Germain focuses on her mathematical feats made under an assumed male name, yet no biography has explained how Germain learned mathematics before that time. *Sophie's Diary: A Mathematical Novel* is an attempt to answer this question. It chronicles the coming of age of a teenager learning mathematics on her own, growing up during the most turbulent years of the French Revolution. The fictionalised diary uses mathematics and historically accurate accounts of the social chaos that reigned in Paris between 1789 and 1794 to describe Germain's remarkable learning journey. The intellectual and personal struggles of this exceptional young woman will inspire a variety of readers, both students and teachers, mathematicians and novices.

Why has love been a crucial political discourse for secular nationalism for generations of political leaders as a powerful instrument to the present day? This book offers the first systematic examination of the ways in which the notion of love has been introduced, adapted and engineered as a political discourse for the building and rebuilding of a secular modern nation, all the while appropriating Confucianism, Christianity, popular religion, ghost stories, political religion and their religious affects. The insights of this exploration expand not only the discussion of the role of emotions in the project of Chinese modernity but also the study of affective governance and religious nationalisms around the
