**Sorghum Production and Utilization** Joseph S. Wall, William M. Ross, 1970 The sorghum plant and grain Production of sorghum Sorghum in other lands Utilization of the plant Utilization of the grain **The Sorghum Genome** Sujay

Rakshit, Yi-Hong Wang, 2017-01-18 This book provides insights into the current state of sorghum genomics It particularly focuses on the tools and strategies employed in genome sequencing and analysis public and private genomic resources and how all this information is leading to direct outcomes for plant breeders The advent of affordable whole genome sequencing in combination with existing cereal functional genomics data has enabled the leveraging of the significant novel diversity available in sorghum the genome of which was fully sequenced in 2009 providing an unmatched resource for the genetic improvement of sorghum and other grass species Cultivated grain sorghum is a food and feed cereal crop adapted to hot and dry climates and is a staple for 500 million of the world's poorest people Globally sorghum is also an important source of animal feed and forage an emerging biofuel crop and model for C4 grasses particularly genetically complex sugarcane

**Jean Toomer** Barbara Foley, 2014-07-15 The 1923 publication of *Cane* established Jean Toomer as a modernist master and one of the key literary figures of the emerging Harlem Renaissance Though critics and biographers alike have praised his artistic experimentation and unflinching eyewitness portraits of Jim Crow violence few seem to recognize how much Toomer's interest in class struggle catalyzed by the Russian Revolution and the post World War One radical upsurge situate his masterwork in its immediate historical context In *Jean Toomer Race Repression and Revolution* Barbara Foley explores Toomer's political and intellectual connections with socialism the New Negro movement and the project of Young America Examining his rarely scrutinized early creative and journalistic writings as well as unpublished versions of his autobiography she recreates the complex and contradictory consciousness that produced *Cane* Foley's discussion of political repression runs parallel with a portrait of repression on a personal level Examining family secrets heretofore unexplored in Toomer scholarship she traces their sporadic surfacing in *Cane* Toomer's text she argues exhibits a political unconscious that is at once public and private *Catalog of Copyright Entries. **Alternative Sweet and Supersweet Principles** Ram Snehi Dwivedi, 2022-09-24 This book compiles the latest information on different kinds of natural plant based super sweeteners A book on alternative natural super sweeteners is extremely timely and useful especially in light of the decreasing cultivable area ever increasing demand for sucrose and the well identified ills of sugar consumption Every year more than 5.0 million people die due to diabetes and diabetes associated diseases like cardiovascular kidney disorder liver cancer etc This book describes the use of non saccharide super sweet principles to counter such maladies The readers will get an in depth understanding of different kinds of sweeteners molecular basis of sweetness their general classification plant source with photo plates etc The chapters explain different kinds of super sweet principles This book emphasizes on the propagation cultivation and conservation of NSSS plants NSSSP

and extraction of super sweet principles and granting of generally recognised as safe GRAS certificate to sweeteners The concluding chapter describes the eco physiological difference between saccharide super sweet and non saccharide sweet plants The book also describes commercial production of selected potential Natural Super Sweeteners This book will be of great interest to researchers extension workers as well as postgraduate students in Food science nutrition ayurveda plant physiology Unani naturopathy biochemistry and plant breeding It would also be of interest to industry stakeholders in sweetener industry and alternative sweetener manufactures Foods of Plant Origin D.K. Salunkhe,S.S.

Deshpande,2012-12-06 The present world population of about five billion and its projected growth create enormous pressures and demands for food and industrial raw materials It is to crop plants one of our precious few renewable resources that we must look to meet most of these needs Globally about 88% of our caloric requirements and 90% of our protein ultimately derive from plant sources ample evidence of their importance to humankind Our survival will therefore continue to depend on the world's largest and certainly most important industry agriculture Yet in spite of our long history of domestication and civilization the number of crop species involved in sustaining human life is strictly limited Essentially some twenty four crops protect us from starvation To know these basic food crop plants to study how they function and how their productivity may be improved is the first step in solving the world food problem The primary objectives in writing this book were to address this challenge and to review comprehensively the wealth of available yet scattered information on food crop productivity and processing Unlike several other texts and monographs in this field the present work was intended to give in a single volume a quick informative view of the various problems from field to table concerning the major food crops worldwide

**Male Sterility in Higher Plants** Mohan L.H. Kaul,2012-12-06 Nature has something more in view than that its own proper males should fecundate each blossom Andrew Knight Philosophical Transactions 1799 Sterility implicating the male sex solely presents a paradoxical situation in which universality and uniqueness are harmoniously blended It maintains a built in outbreeding system but is not an isolating mechanism as male steriles the self emasculated plants outcross with their male fertile sibs normally Both genes nuclear and cytoplasmic and environment individually as well as conjointly induce male sterility the former being genetic and the latter nongenetic Genetic male sterility is controlled either exclusively by nuclear genes or by the complementary action of nuclear and cytoplasmic genes The former is termed genic and the latter gene cytoplasmic male sterility Whereas genic male sterility exhibits Mendelian inheritance gene cytoplasmic male sterility is non Mendelian with specific transmissibility of the maternal cytoplasm type Genetic male sterility is documented in 617 species and species crosses comprising 320 species 162 genera and 43 families Of these genic male sterility occurs in 216 species and 17 species crosses and gene cytoplasmic male sterility in 16 species and 271 species crosses The Predominance of species exhibiting genic male sterility and of species crosses exhibiting gene cytoplasmic male sterility is due to the fact that for the male sterility expression in the former mutation of nuclear genes is required but in the latter

mutations of both nuclear and cytoplasmic genes are necessary      *National Agricultural Library Catalog* National
