difference between conventional training and combatives training is defined by two simple words intent and intensity Each needs the other to be maximally effective and conventional martial arts lack both Without truly knowing if something will actually work in live combat how can an instructor teach combat skills to someone whose life may depend on those skills If you are ever in a situation where you re face to face with pure evil and you re not both physically and mentally prepared for violent deadly combat then that is the day you will likely die The author shows that you must be able to bring violence of action against the bad guy to such a degree that it doesn t just counter his attack but destroys him for attempting to do you harm You will learn how to evaluate your current training against the criteria of the perfect technique to judge everything you do as to whether it will work in real combat or not and avoid wasting your valuable time doing things that are of no value Learning and applying principles and concepts outlined in this book will give you the confidence you need to never again wonder Will this really work or Can I do this You will learn that the true mastery of fighting skills is not just based on confidence in the techniques but ultimately in the confidence you have in yourself Some of the subjects covered in detail include 1 The principles strategies and tactics of combat2 The physical physiological and psychological effects of combat on the human body and how to use them to your advantage3 The 3 Laws of Combat and the 6 Instinctual Triggers4 The high art of preemptive self defense5 The importance of being able to distinguish between capability and capacity Combative fighting skills is not a martial art It is hard intense painful training along with the development of the Warrior Mindset Without that mindset and the iron will to win you are only using half of your power The other half is in the mind You will learn how important it is to never neglect one for the other Ernest Emerson has worked with members of the Naval Special Warfare Community Navy SEALs for over 25 years He carried a DOD top secret clearance for 15 years He is the owner of Emerson Knives Inc and the Black Shamrock Combat Academy in Los Angeles California *The Art of Striking* Marc Tedeschi,2002 This illuminating work outlines the essential principles and techniques that define the art of striking in most martial arts More than 1 400 outstanding photographs introduce over 400 practical techniques encompassing all types of strikes hand strikes elbow strikes standing kicks aerial kicks ground kicks head and body strikes advanced combinations avoiding and blocking skills defenses against punches and kicks and pressure point attacks Comprehensive introductory chapters provide an authoritative overview of important technical principles East Asian energetic concepts and 109 fundamental skills encompassing hitting surfaces stances footwork and common methods of falling Precise anatomical illustrations and descriptions of 106 common Oriental pressure points and a visual comparison of different martial arts make this an invaluable resource for all martial styles Expertly written and designed by the author of the 1 136 pageHapkido widely acclaimed the most comprehensive book ever written on a single martial art this exceptional work is designed to stand alone or function as a companion text with the author s other works on martial techniques and anatomy Regardless of the style you practice these books will enrich your training improve your technique and deepen your understanding of the unique qualities
