**Violence and Nihilism** Luís Aguiar de Sousa, Paolo Stellino, 2022-07-05 Nihilism seems to be per definition linked to violence Indeed if the nihilist is a person who acknowledges no moral or religious authority then what does stop him from committing any kind of crime Dostoevsky precisely called attention to this danger if there is no God and no immortality of the soul then everything is permitted even anthropophagy Nietzsche too emphasised although in different terms the consequences deriving from the death of God and the collapse of Judeo Christian morality This context shaped the way in which philosophers writers and artists thought about violence in its different manifestations during the 20th century The goal of this interdisciplinary volume is to explore the various modern and contemporary configurations of the link between violence and nihilism as understood by philosophers and artists in both literature and film

**Sacred Sounds** Rebecca Murphy, 2025-03-06 Sacred Sounds explores the profound connection between sound and spiritual experiences across diverse cultures It examines how sounds such as bells and chanting serve as more than just auditory input acting as conduits to the divine and tools for ritual transformation One intriguing aspect is how architectural acoustics in sacred spaces are intentionally designed to enhance spiritual experiences

through sound manipulation The book highlights the unique cultural meanings imbued in sounds emphasizing the importance of understanding these contexts to appreciate the diversity of spiritual expression The book progresses by first examining the historical and social contexts of sonic worship Specific case studies like the use of gongs in shamanic rituals illustrate how sound creates sacred space It delves into the psycho spiritual impact revealing how sounds affect human emotions and cognitive states potentially facilitating altered states of consciousness This approach challenges purely text based interpretations of religion focusing on the auditory sensory experience Sacred Sounds offers a holistic view by integrating insights from religious studies musicology and anthropology It provides a valuable resource for those interested in the power of sound to shape human experience offering practical implications for sound design and cross cultural communication while also addressing ethical considerations surrounding the use of sound in religious settings

**The Divine Voice** Stephen H. Webb, 2012-01-20 Webb offers a carefully and creatively wrought phenomenology of sound showing its relation to the proclamation of God's Word His keen insights on the primordial nature of sound speech and hearing will force theologians to examine once again what it means to be a hearer of the Word Webb masterfully displays the intrinsic relationship between dynamic listening and speech how intent hearing and confident proclamation are intimately conjoined He has the rare gift of combining acute theological insight with a mellifluous readable style The nature of God's own Word here becomes clearer vibrant and tensile life giving in tone and texture Whether examining Jesus as the voice of the Father the role of voice in innertrinitarian relations or the relationship between voice and gender Webb offers the kind of thought provoking and highly creative reflections rarely found elsewhere He has a creative and incisive theological mind Thomas Guarino Seton Hall University Being appreciative of Webb's earlier work on hyperbolic language in theology and preaching I welcomed *The Divine Voice* How risky to toss a spoken word into a room of silent readers and expect it to be heard I was reprimanded instructed and moved by the sound of this book Were I still in the seminary classroom *The Divine Voice* would be required reading before one word was said about how to preach Fred B Craddock The Craddock Center *The Divine Voice* is a book of academic theology worthy of the Psalmist who sang Day after day the word goes forth night after night the story

is told Soundless the speech voiceless the talk yet the story is echoed throughout the world Ps 19 2 3 Stephen Webb is an acoustemological theologian for whom speech can be prayerful as silence and silence as instructive as proclamation When the sounds heard by faith reach Webb s ever insightful and creative mind only synesthesia could result and the result is a gift for us all Peter Ochs University of Virginia *The Science and Practice of Humility* Jason Gregory,2014-10-09 Humility being open and receptive to all experience is the key to becoming one with the spontaneous patterns of the universe Integrates classic teachings of Hinduism and Buddhism with principles of quantum physics to reveal the science of the enlightened masters Reveals how we are each capable of shifting from the aggressive path of the warrior to the humble path of the sage Explains how the key to catching the current acceleration of conscious evolution is humility From Krishna and Lao tzu to Buddha and Jesus each enlightened master discovered how being receptive to all experience was the key to becoming one with the universe and its spontaneous patterns of order and chaos Revealing humility as the purest expression of this receptivity Jason Gregory integrates classic teachings of Hinduism Buddhism Taoism and Hermeticism with principles from quantum physics to explain the science of humility as practiced by the ancient masters The author shows how driven by fear the human mind creates the ego In its greedy and arrogant quest to protect the self and its desires the ego forges the illusion of separation weaving complex patterns of reality that shield us from our unity with all beings and result in attitudes of aggression selfishness and competition He reveals how the iconic clash between this complex aggressive path of the warrior and the simple path of the sage is reflected in the polarized state of the modern world Yet this state also reflects the accelerating wave of conscious evolution we are now experiencing The key to catching this evolutionary wave is humility the reversal of complexity into simplicity the ancient science of mental alchemy that represents the Great Work of Eternity

**Quantifying Music** H.F. Cohen,2013-11-11 The soul rejoices in perceiving harmonious sound when the sound is not harmonious it is grieved From these affects of the soul are derived the name of consonances for the harmonic proportions and the name of dissonances for the unharmonic proportions When to this is added the other harmonie proportion which consists of the longer or shorter duration of musical sound then the soul stirs the body to jumping dance the tongue to inspired speech according to the same laws The artisans accommodate to these harmonies the blows of their hammers the soldiers their pace As long as the harmonies endure everything is alive everything stiffens when they are disturbed Thus the German astronomer Johannes Kepler evokes the power of music Where does this power come from What properties of music enable it to stir up emotions which may go far beyond just feeling generally pleased and which may express themselves for instance in weeping in laughing in trembling over the whole body in a marked acceleration of breathing and heartbeat in participating in the rhythm with the head the hands the arms and the feet From the beginning of musical theory the answer to this question has been sought in two different directions **The Global Sixties in Sound and Vision** T. Brown,A. Lison,2014-05-01 Despite the explosion of interest in the global 1968 the arts in this period both popular and avant garde

forms have too often been neglected This interdisciplinary volume brings together scholars in history cultural studies musicology and other areas to explore the symbiosis of the sonic and the visual in the counterculture of the 1960s     *Sounds and Perception* Matthew Nudds, Casey O'Callaghan, 2009-11-26 *Sounds and Perception* is a collection of original essays on auditory perception and the nature of sounds an emerging area of interest in the philosophy of mind and perception and in the metaphysics of sensible qualities The individual essays discuss a wide range of issues including the nature of sound the spatial aspects of auditory experience hearing silence musical experience and the perception of speech a substantial introduction by the editors serves to contextualise the essays and make connections between them This collection will serve both as an introduction to the nature of auditory perception and as the definitive resource for coverage of the main questions that constitute the philosophy of sounds and audition The views are original and there is substantive engagement among contributors This collection will stimulate future research in this area     **Library of Universal Knowledge** ,1880

**Hearing Our Prayers** Juliette J. Day, 2024-03-15 How do we hear our prayers In the words of philosopher Gemma Corradi Fiumara there can be no saying without hearing no speaking which is not an integral part of listening no speech which is not somehow received Therefore hearing should be considered an essential aspect of participation in Christian worship However although almost all studies of Christian worship attend to the words spoken and sung almost none consider how worshippers hear in the liturgical event In *Hearing Our Prayers* Juliette Day draws upon insights from liturgical studies philosophy psychology acoustical science and architectural studies to investigate how acts of audition occur in Christian worship The book discusses the different listening strategies worshippers use for speech chant and music as well as for silence and noise why paying attention in church can be so difficult and how what we hear is affected by the buildings in which worship takes place Day concludes by identifying liturgical listening as a particular type of ritual participation and emphasizes that liturgical listening is foundational for the way in which we pray and think about God the church and the world     **How to Overcome Death** Glen C. Cutlip, 2000-02-28 The overcoming of death is a serious undertaking because death is a part of the nature one's being and therefore not what it appears to be When Death is reconciled with life it becomes a means of interdimensional travel We realize that it wasn't there in the first place Therefore the overcoming of death is to take place within one's present consciousness for death is the counterpart of life in the first place Therefore the resurrection unto life is from the death that is hidden in life It is the dead that appear to be living that are resurrected unto life Death is something that is a part of one's present consciousness not something off somewhere in the so called afterlife The resurrection of the dead is unto conscious life or immortality or back into the realm of unconscious death for life and death occupy the same space It is a matter of seeing death as it is not just as it appears to be In that death is not what it appears to be the overcoming of death is not what it appears to be Therefore it is a real possibility It can be realized within one's lifetime The Overcoming of Death is the means of bringing the realization of conscious immortality to the awareness of

ones present consciousness in this lifetime It reveals why it is that losing life is finding it and how it is that it is the dead that are living that hear the voice of the Son of God and are resurrected from the dead      Sound effects Laura Jayne Wright, 2023-06-27 This book shows that the sounds of the early modern stage do not only signify but are also significant Sounds are weighted with meaning offering a complex system of allusions Playwrights such as Jonson and Shakespeare developed increasingly experimental soundscapes from the storms of King Lear 1605 and Pericles 1607 to the explosive laboratory of The Alchemist 1610 Yet sound is dependent on the subjectivity of listeners this book is conscious of the complex relationship between sound as made and sound as heard Sound effects should not resound from scene to scene without examination any more than a pun can be reshaped in dialogue without acknowledgement of its shifting connotations This book listens to sound as a rhetorical device able to penetrate the ears and persuade the mind to influence and to affect
