His Majesty's Airship S C Gwynne, 2024-05-21

The tragic story of the British airship R101 which went down in a spectacular hydrogen fueled fireball in 1930, killing more people than died in the Hindenburg disaster seven years later, has been largely forgotten. In *His Majesty's Airship*, historian S C Gwynne resurrects it in vivid detail, telling the epic story of great ambition gone terribly wrong. Airships, those airborne leviathans that occupied center stage in the world in the first half of the twentieth century, were a symbol of the future. R101 was not just the largest aircraft ever to have flown and the product of the world's most advanced engineering; she was also the lynchpin of an imperial British scheme to link by air the far flung areas of its empire from Australia to India, South Africa, Canada, Egypt and Singapore. No one had ever conceived of anything like this. R101 captivated the world. There was just one problem: beyond the hype and technological wonders, these big steel framed hydrogen filled airships were a dangerously bad idea. Gwynne's chronicle features a cast of remarkable and often tragically flawed characters, including Lord Christopher Thomson, the man who dreamed up the Imperial Airship Scheme and then relentlessly pushed R101 to her destruction; Princess Marthe Bibesco, the celebrated writer and glamorous socialite with whom he had a long affair; and Herbert Scott, a national hero who had made the first double crossing of the Atlantic in any aircraft in 1919, eight years before Lindbergh's famous flight, but who devolved into drink and ruin. These historical figures and the ship they built, flew and crashed, come together in a grand tale that details the rocky road to commercial aviation, written by one of the best popular historians writing today.

A Belle Epoque? Diana Holmes, Carrie Tarr, 2006-01-01

The Third Republic, known as the belle époque, was a period of lively, articulate and surprisingly radical feminist activity in France, borne out of the contradiction between the Republican ideals of liberty, equality and fraternity and the reality of intense and systematic gender discrimination. Yet it also was a period of intense and varied artistic production, with women disproving the critical near-consensus that art was a masculine activity by writing, painting, performing, sculpting and even displaying an interest in the new seventh art of cinema. This book explores all these facets of the period, weaving them into a complex, multi-stranded argument about the importance of this rich period of French women's history.

Railways and Culture in Britain Ian Carter, 2001 The 19th century steam railway epitomized modernity's relentlessly onrushing advance Ian Carter delves into the cultural impact of the train Why for example did Britain possess no great railway novel He compares fiction and images by canonical British figures Turner Dickens Arnold Bennett with selected French and Russian competitors Tolstoy Zola Monet Manet He argues that while high cultural work on the British steam railway is thin British popular culture did not ignore it Detailed discussions of comic fiction crime fiction and cartoons reveal a popular fascination with railways tumbling from vast and hitherto unexplored stores of critically overlooked genres
