The Berhama Account John A. Williams, 1985 The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential *Conversations with John A. Williams* Jeffrey Allen Tucker, 2018-02-20 One of the most prolific African American authors of his time John A Williams 1925-2015 made his mark as a journalist educator and writer Having worked for Newsweek Ebony and Jet magazines Williams went on to write twelve novels and numerous works of nonfiction A vital link between the Black Arts movement and the previous era Williams crafted works of fiction that relied on historical research as much as his own finely honed skills From *The Man Who Cried* I Am a roman clef about expatriate African American writers in Europe to *Clifford's Blues* a Holocaust novel told in the form of the diary entries of a gay black jazz pianist in Dachau these representations of black experiences marginalized from official histories make him one of our most important writers *Conversations with John A Williams* collects twenty three interviews with the three time winner of the American Book Award beginning with a discussion in 1969 of his early works and ending

with a previously unpublished interview from 2005 Gathered from print periodicals as well as radio and television programs these interviews address a range of topics including anti black violence Williams s WWII naval service race and publishing interracial romance Martin Luther King Jr growing up in Syracuse the Prix de Rome scandal traveling in Africa and Europe and his reputation as an angry black writer The conversations prove valuable given how often Williams drew from his own life and career for his fiction They display the integrity social engagement and artistic vision that make him a writer to be reckoned with
