

LAW OF GRAVITY

Law of Gravity, formulated by Sir Isaac Newton, describes the mutual attraction between two objects due to their mass. It states that the gravitational attraction force is directly proportional to the product of their masses and inversely proportional to the square of the distance between their centers.

The mathematical equation is:

$$F = G \cdot \frac{m_1 \cdot m_2}{r^2}$$

where F is the force, G is the gravitational constant, m_1 and m_2 are the masses, and r is the distance.
