The Law Of Non Navigational Uses Of International Watercourses:

The UN Convention on the Law of the Non-Navigational Uses of International Watercourses Laurence Boisson de Chazournes, Makane Moïse Mbengue, Mara Tignino, Komlan Sangbana, Jason Rudall, 2018-12-13 The United Nations Convention on the Law of the Non Navigational Uses of International Watercourses plays a crucial role in protecting and managing international watercourses and other sources of fresh water Boisson de Chazournes Mbengue Tignino and Sangbana head a team of experts in this Commentary examining the travaux préparatoires leading to the Convention and the practice that has developed since the adoption of the Convention in 1997 Tackling the rationale and objectives of the provisions they offer crucial insights to the Convention's impact on the development of a universal regime for shared water resources Examining cross cutting topics such as the core water principles the prevention and settlement of water disputes the relationship between the Convention and other legal instruments as well as the role of the ICJ and other judicial means to solve water disputes this book is crucial to all those who seek a deep understanding of water law **The Law of Non-Navigational Uses of International Watercourses** J. Bruhács, 2023-11-27 The presentation of the historical development and the scientific elaboration of the international law regulating non navigational uses of international watercourses exemplifies the richness of this branch of international law The role of general international law in this field of international relations the acceptance thereof by the international community its legal nature functions contents and codification are all examined Finally an outline of the institutions of international cooperation is given *The Law of Non-navigational Uses of International Watercourses* Nahid Islam, 2010-01-01 Presentation de l'auteur Despite Asia's large share of global water resources and the importance of its water for sustaining one of the largest agrarian populations in the world Asia's trans boundary water resource management regimes are poorly developed There are only two working international regimes in South and South east Asia the Mekong and the Indus regimes The remaining international watercourses in Asia are used by riparian countries in a self interested manner without much consideration for the interests of other states or for the environment These national interests do not often represent the interests and needs of the local people This book is divided into three Parts Part I discusses the different contexts of law making in the industrialized west and in agrarian societies in Asia as well as the changing context of law making following the emergence of the concept of sustainable development Part II discusses the regime of international watercourses Part III of the book presents two case studies in Asia the Mekong and the Ganges The main argument is that in the absence of public participation in decision making and resource management the basin states revert to using the watercourses according to the principles of the classical regime The result so far has been unsustainable development environmental degradation and growing poverty of local user communities **The Law of Non-navigational Uses of International Watercourses** János Bruhács, 1993 Equitable Utilization Ibrahim Kaya, 2003 International watercourse law differs from the national laws of most countries It

was of little consequence until the Industrial Revolution but as resources have become scarcer it has taken on a much greater political and economic significance Ibrahim Kaya's study addresses the key issues

The UN Convention on the Law of the Non-Navigational Uses of International Watercourses Laurence Boisson de Chazournes, Makane Moïse Mbengue, Mara Tignino, Komlan Sangbana, Jason Rudall, 2018-12-13 The United Nations Convention on the Law of the Non-Navigational Uses of International Watercourses plays a crucial role in protecting and managing international watercourses and other sources of fresh water Boisson de Chazournes Mbengue Tignino and Sangbana head a team of experts in this Commentary examining the travaux préparatoires leading to the Convention and the practice that has developed since the adoption of the Convention in 1997 Tackling the rationale and objectives of the provisions they offer crucial insights to the Convention's impact on the development of a universal regime for shared water resources Examining cross-cutting topics such as the core water principles the prevention and settlement of water disputes the relationship between the Convention and other legal instruments as well as the role of the ICJ and other judicial means to solve water disputes this book is crucial to all those who seek a deep understanding of water law

The law of non-navigational uses of international watercourses - The International Law Commission completes its draft M. Fitzmaurice, *The Law of International Watercourses* Stephen C. McCaffrey, 2003 The Law of International Watercourses examines the rules of international law governing the non-navigational uses of international watercourses The continued growth of the world's population places increasing demands on Earth's finite supply of fresh water Because two or more states share many of the world's most important drainage basins including The Danube The Ganges The Indus The Jordan The Mekong The Nile The Rhine and The Tigris Euphrates competition for increasingly scarce fresh water resources is likely to increase Resulting disputes will be resolved against the backdrop of the rules of international law governing the use of international watercourses In addition these rules are of importance to donor institutions and governments that provide development assistance for projects relating to shared fresh water resources While the law of international watercourses continues to evolve due to the intensification of use of shared fresh water resources and consequently increasingly frequent contacts between riparian states the basic rules are reflected in the 1997 UN Convention on the law of the non-navigational uses of international watercourses This book devotes a chapter to the 1997 Convention but also examines the factual and legal context in which the Convention should be understood considers the more important rules of the Convention in some depth and discusses specific issues that could not be addressed in a framework instrument of that kind In particular the book studies the major cases and controversies concerning international watercourses as a background against which to consider the basic substantive and procedural rights and obligations of states

International Watercourses Law for the 21st Century Surya P. Subedi, 2016-12-05 This edited volume presents a comprehensive and comparative view of the law of international watercourses with special reference to the issues facing the Ganges River basin It provides an analysis of the development of

international waterways law and outlines the essentials of the UN Convention on non navigational uses of international watercourses Focusing on relations between the three riparian states of the River Ganges and the potential for cooperation the volume also examines the domestic legal regimes of the area and the political dimension to the issues of sharing the waters of the river The work presents a comparative picture with an analysis of developments in the Rhine and Mekong basins comparing developments in the legal regimes of these areas with the experience of South Asia Presenting an up to date analysis of the current law and pointing the direction for future developments this collection will be a valuable resource for academics researchers and policy makers working in this area
