imagination **Bodies, Sex and Desire from the Renaissance to the Present** Kate Fisher, Sarah Toulalan, 2015-12-11 An examination of how bodies and sexualities have been constructed categorised represented diagnosed experienced and subverted from the fifteenth to the early twenty first century It draws attention to continuities in thinking about bodies and sex concept may have changed but they nevertheless draw on older ideas and language **Reader's Guide to the History**

of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

Philosophy, Science, and History Lydia Patton, 2014-06-27 Philosophy Science and History A Guide and Reader is a compact overview of the history and philosophy of science that aims to introduce students to the groundwork of the field and to stimulate innovative research The general introduction focuses on scientific theory change assessment discovery and pursuit Part I of the Reader begins with classic texts in the history of logical empiricism including Reichenbach's discovery justification distinction With careful reference to Kuhn's analysis of scientific revolutions the section provides key texts analyzing the relationship of HOPoS to the history of science including texts by Santayana Rudwick and Shapin and Schaffer Part II provides texts illuminating central debates in the history of science and its philosophy These include the history of natural philosophy Descartes Newton Leibniz Kant Hume and du Châtelet in a new translation induction and the logic of discovery including the Mill Whewell debate Duhem and Hanson and catastrophism versus uniformitarianism in natural history Playfair on Hutton and Lyell de Buffon Cuvier and Darwin The editor's introductions to each section provide a broader perspective informed by contemporary research in each area including related topics Each introduction furnishes proposals including thematic bibliographies for innovative research questions and projects in the classroom and in the field

Enlightenment Contested Jonathan I. Israel, 2006-10-12 Jonathan Israel presents the first major reassessment of the Western Enlightenment for a generation Continuing the story he began in the best selling *Radical Enlightenment* and now focusing his attention on the first half of the eighteenth century he returns to the original sources to offer a groundbreaking new perspective on the nature and development of the most important currents in modern thought Israel traces many of the core principles of Western modernity to their roots in the social political and philosophical ferment of this period the primacy of reason democracy racial equality feminism religious toleration sexual emancipation and freedom of expression He emphasizes the dual character of the Enlightenment and the bitter struggle between on the one hand a generally dominant anti democratic mainstream supporting the monarchy aristocracy and ecclesiastical authority and on the other a largely repressed democratic republican and materialist radical fringe He also contends that the supposedly separate French British German Dutch and Italian enlightenments interacted to such a degree that their study in isolation gives a hopelessly

distorted picture A work of dazzling and highly accessible scholarship Enlightenment Contested will be the definitive reference point for historians philosophers and anyone engaged with this fascinating period of human development

Biology and Ideology from Descartes to Dawkins Denis R. Alexander, Ronald L. Numbers, 2010-05-15 Over the course of human history the sciences and biology in particular have often been manipulated to cause immense human suffering For example biology has been used to justify eugenic programs forced sterilization human experimentation and death camps all in an attempt to support notions of racial superiority By investigating the past the contributors to Biology and Ideology from Descartes to Dawkins hope to better prepare us to discern ideological abuse of science when it occurs in the future Denis R Alexander and Ronald L Numbers bring together fourteen experts to examine the varied ways science has been used and abused for nonscientific purposes from the fifteenth century to the present day Featuring an essay on eugenics from Edward J Larson and an examination of the progress of evolution by Michael J Ruse Biology and Ideology examines uses both benign and sinister ultimately reminding us that ideological extrapolation continues today An accessible survey this collection will enlighten historians of science their students practicing scientists and anyone interested in the relationship between science and culture

The French Revolution in Global Perspective Suzanne Desan, Lynn Hunt, William Max Nelson, 2013-03-19 Situating the French Revolution in the context of early modern globalization for the first time this book offers a new approach to understanding its international origins and worldwide effects A distinguished group of contributors shows that the political culture of the Revolution emerged out of a long history of global commerce imperial competition and the movement of people and ideas in places as far flung as India Egypt Guiana and the Caribbean This international approach helps to explain how the Revolution fused immense idealism with territorial ambition and combined the drive for human rights with various forms of exclusion The essays examine topics including the role of smuggling and free trade in the origins of the French Revolution the entwined nature of feminism and abolitionism and the influence of the French revolutionary wars on the shape of American empire The French Revolution in Global Perspective illuminates the dense connections among the cultural social and economic aspects of the French Revolution revealing how new political forms at once democratic and imperial anticolonial and centralizing were generated in and through continual transnational exchanges and dialogues Contributors Rafe Blaufarb Florida State University Ian Collier La Trobe University Denise Davidson Georgia State University Suzanne Desan University of Wisconsin Madison Lynn Hunt University of California Los Angeles Andrew Jainchill Queen's University Michael Kwass The Johns Hopkins University William Max Nelson University of Toronto Pierre Serna Universit Paris I Panth on Sorbonne Miranda Spieler University of Arizona Charles Walton Yale University
