The Limits Of Human Nature:

The Limits of Human Nature Jonathan Benthall, 1974 *Human Nature and the Limits of Science* John Dupré, 2001
Dupré warns that our understanding of human nature is being distorted by two faulty and harmful forms of pseudo scientific thinking. He claims it is important to resist scientism, an exaggerated conception of what science can be expected to do.

Human Nature and the Limits of Darwinism Whitley R.P. Kaufman, 2016-06-22
This book compares two competing theories of human nature: the more traditional theory espoused in different forms by centuries of western philosophy and the newer Darwinian model. In the traditional view, the human being is a hybrid being with a lower animal nature and a higher rational or spiritual component. The competing Darwinian account does away with the idea of a higher nature and attempts to provide a complete reduction of human nature to the evolutionary goals of survival and reproduction. Whitley Kaufman presents the case that the traditional conception, regardless of one's religious views or other beliefs, provides a superior account of human nature and culture. We are animals, but we are also rational animals. Kaufman explores the most fundamental philosophical questions as they relate to this debate over human nature: for example, Is free will an illusion? Is morality a product of evolution with no objective basis? Is reason merely a tool for promoting reproductive success? Is art an adaptation for attracting mates? Is there any higher meaning or purpose to human life? *Human Nature and the Limits of Darwinism* aims to assess the competing views of human nature and present a clear account of the issues on this most pressing of questions. It engages in a close analysis of the numerous recent attempts to explain all human aims in terms of Darwinian processes and presents the arguments in support of the traditional conception of human nature.

[The Perfectibility of Human Nature in Eastern and Western Thought](#) Harold Coward, 2012-02-01
How perfectible is human nature as understood in Eastern and Western philosophy, psychology, and religion? Harold Coward examines some of the very different answers to this question. He poses that in Western thought, including philosophy, psychology, Judaism, Christianity, and Islam, human nature is often understood as finite, flawed, and not perfectible, in religion requiring God's grace and the afterlife to reach the goal. By contrast, Eastern thought, arising in India, frequently sees human nature to be perfectible and presumes that we will be reborn until we realize the goal, the various yoga, psychologies, philosophies, and religions of Hinduism and Buddhism being the paths by which one may perfect oneself and realize release from rebirth. Coward uses the striking differences in the assessment of how perfectible human nature is as the comparative focus for this book.

Why We Disagree About Human Nature Elizabeth Hannon, Tim Lewens, 2018-06-18
Is human nature something that the natural and social sciences aim to describe, or is it a pernicious fiction? What role, if any, does human nature play in directing and informing scientific work? Can we talk about human nature without invoking either implicitly or explicitly a contrast with human culture? It might be tempting to think that the respectability of human nature is an issue that divides natural and social scientists along disciplinary boundaries, but the truth is more complex. The contributors to this collection take very different stances.

with regard to the idea of human nature They come from the fields of psychology the philosophy of science social and biological anthropology evolutionary theory and the study of animal cognition Some of them are human nature enthusiasts some are sceptics and some say that human nature is a concept with many faces each of which plays a role in its own investigative niche Some want to eliminate the notion altogether some think it unproblematic others want to retain it with reforming modifications Some say that human nature is a target for investigation that the human sciences cannot do without others argue that the term does far more harm than good The diverse perspectives articulated in this book help to explain why we disagree about human nature and what if anything might resolve that disagreement The Brighter Side Of Human Nature Alfie Kohn,2008-08-05 Drawing from hundreds of studies in half a dozen fields The Brighter Side of Human Nature makes a powerful case that caring and generosity are just as natural as selfishness and aggression This lively refutation of cynical assumptions about our species considers the nature of empathy and the causes of war why we incorrectly explain all behavior in terms of self interest and how we can teach children to care **Hume's Scepticism and the Science of Human Nature** Paul Stanistreet,2017-07-05 This book explores the relationship between Hume s sceptical philosophy and his Newtonian ambition of founding a science of human nature Assessing both received and new readings of Hume s philosophy Stanistreet offers a line of interpretation which he argues makes sense of many of the apparent conflicts and paradoxes in Hume s work and describes how well known controversies concerning Hume s thinking about causation induction and the external world can be resolved Offering important new contributions to Hume scholarship this book also surveys and assesses the new research responsible for the recent sea change in thinking about Hume It offers an accessible overview of these developments while suggesting significant revisions to current readings of Hume s philosophy

Universal Human Rights in Theory and Practice Jack Donnelly,2003 4 Choice of Means **Romanism the Religion of Human Nature** Richard Whately (Archbishop of Dublin.),1878 The Paradox of Human Nature and Religious Faith Christopher G. Smith,2020-11-28 This is a book for our time The advent of Covid 19 is turning our world upside down and highlighting the paradoxical nature of human behaviour A minority of thoughtless people are indulging in selfish activities that threaten our safety whilst NHS workers heroically risk their own lives to save others In South Africa members of rival drug gangs who would normally kill each other without a second thought have called a truce and are now working together in order to ensure that food is distributed to needy families Human nature is paradoxical because it is capable of perceiving both the finite secular and infinite spiritual which are juxtaposed within the context of reality What makes this book different is that spirituality is not considered to be other worldly What we refer to as the secular and the spiritual are viewed as two sides of a coin that co exist as part of one reality within the context of temporality Both contribute to what we perceive to be a sense of self They are different perceptions of consciousness that influence human behaviour through conscious and subconscious processes The aim of this book is to consider the factors that contribute to the paradoxical

nature of being human and to explore the issues that cloud our perceptions and cause confusion It proffers a vision of how a religious faith can be made intelligible at a time when the majority of people living in our postmodern age consider it to be irrelevant
