Surdam, 2021-08-06 Organized baseball has survived its share of difficult times and never was the state of the game more imperiled than during the Great Depression Or was it Remarkably during the economic upheavals of the Depression none of the sixteen Major League Baseball teams folded or moved In this economist's look at the sport as a business between 1929 and 1941 David George Surdam argues that although it was a very tough decade for baseball the downturn didn't happen immediately The 1930 season after the stock market crash had record attendance But by 1931 attendance began to fall rapidly plummeting 40 percent by 1933 To adjust teams reduced expenses by cutting coaches and hiring player managers While even the best players such as Babe Ruth were forced to take pay cuts most players continued to earn the same pay in terms of purchasing power Baseball remained a great way to make a living Revenue sharing helped the teams in small markets but not necessarily at the expense of big city teams Off the field owners devised innovative solutions to keep the game afloat including the development of the Minor League farm system night baseball and the first radio broadcasts to diversify teams income sources Using research from primary documents Surdam analyzes how the economic structure and operations side of Major League Baseball during the Depression took a beating but managed to endure albeit changed by the societal forces of its time

The Seven Day Circle Eviatar Zerubavel, 1989-03-15 Days months and years were given to us by nature but we invented the week for ourselves There is nothing inevitable about a seven day cycle or about any other kind of week it represents an arbitrary rhythm imposed on our activities unrelated to anything in the natural order But where the week exists and there have been many cultures where it doesn't it is so deeply embedded in our experience that we hardly

ever question its rightness or think of it as an artificial convention for most of us it is a matter of second nature

Labor laws of the United States series United States. Bureau of Labor Statistics, 1919 *Awards ... Third Division, National Railroad Adjustment Board* United States. National Railroad Adjustment Board, Java and Modern Europe Ann Kumar, 2013-10-11 This book presents a case study of Europe's impact on an old and distinctive non-European civilisation. Part One deals with the elements in Europe's strength: technological, political, and intellectual. It also uses Wallerstein's world systems perspective to give an economic dimension to this picture of the new world of Europe and then looks at the important question of the changing place of the Dutch in the new economic order from the seventeenth to the eighteenth century. This is followed by a brief account of the history of the Dutch East India Company in Java and its political effects. Part Two deals with the nature of the Javanese ancien regime both in court and in provincial circles with a focus on society and civilisation rather than those staples of Javanese historiography: to date political events and economic statistics. Part Three deals with the overall pattern set by the VOC's changing economic imperatives and with the impact of the successive tides of capitalism on three regional societies of Java. Part Four deals with intellectual shifts that took place in this period and argues that these shifts were less conservative than the socio-economic ones described in Part Three and though more fragile and vulnerable were crucial for the future. The conclusion attempts to show the significance of these developments for modern Indonesia and the way in which some of the dynamics begun in this period are being played out in the contemporary world.
