Small Killing:

The Shock of the Old David Edgerton, 2007-01-22 From the books of H G Wells to the press releases of NASA we are awash in clichéd claims about high technology's ability to change the course of history Now in *The Shock of the Old* David Edgerton offers a startling new and fresh way of thinking about the history of technology radically revising our ideas about the interaction of technology and society in the past and in the present He challenges us to view the history of technology in terms of what everyday people have actually used and continue to use rather than just sophisticated inventions Indeed many highly touted technologies from the V 2 rocket to the Concorde jet have been costly failures while many mundane discoveries like corrugated iron become hugely important around the world Edgerton reassesses the significance of such acclaimed inventions as the Pill and information technology and underscores the continued importance of unheralded technology debunking many notions about the implications of the information age A provocative history *The Shock of the Old* provides an entirely new way of looking historically at the relationship between invention and innovation

Run-time Models for Self-managing Systems and Applications Danilo Ardagna, Li Zhang, 2010-11-15 The complexity of Information Technology IT systems has been steadily increasing in the past decades In October 2001 IBM released the Autonomic Computing Manifesto observing that current applications have reached the size of millions of lines of code while physical infrastructures include thousands of heterogeneous servers requiring skilled IT professionals to install configure tune and maintain System complexity has been recognized as the main obstacle to the further advancement of IT technology The basic idea of Autonomic Computing is to develop IT systems that are able to manage themselves as the human autonomic nervous system governs basic body functions such as heart rate or body temperature thus freeing the conscious brain IT administrators from the burden of dealing with low level vital functions Autonomic Computing systems can be implemented by introducing autonomic controllers which continuously monitor analyze plan and execute the famous MAPE cycle reconfiguration actions on the system components Monitoring activities are deployed to measure the workload and performance metrics of each running component so as to identify system faults The goal of the analysis activities is to determine the status of components from the monitoring data and to forecast future conditions based on historical observations Finally plan and execute activities aim at deciding and actuating the next system configuration for example deciding whether to accept or reject new requests determining the best application to servers assignment in order to achieve the self optimization goals

The Oklahoma City Bombing Diane Andrews Henningfeld, 2012-02-17 The Oklahoma City bombing was a heart breaking American safety shattering event This fascinating volume explores the historical and cultural events leading up to and following the bombing of the Alfred P Murrah Federal Building on April 19 1995 This book addresses issues surrounding the bombing such as the identity of John Doe No 2 the media's possible misrepresentation of the militia movement's involvement and whether Timothy

McVeigh's confession was voluntary. Personal narratives are included from people impacted by the bombing including a secretary trapped in the wreckage, a search and rescue worker, and a high school student who lost her father. *The War of the Rebellion* United States. War Department, 1897. *Tempting the Highlander* Michele Sinclair, 2011-05-26. The author of *Desiring the Highlander* entertains with noble self-sacrifice, double deceptions, sizzling attraction, and affectionate meddling. Publishers Weekly. Of the seven bold brothers born to defend their Scottish Highlands, Crevan McTiernay is the most restrained. But that doesn't make him any less passionate. It begins as a ploy. When Raelynd Schellden and her sister are caught in the stables with the notorious McTiernay twins, her father sees not scandal but opportunity. The future of his clan is uncertain, and a double engagement, even under false pretenses, will lend security to his people and protect his beloved daughters from power-mad fools. And he becomes a pleasure. But Raelynd's designated, intended interests are far less than his quietly powerful brother, Crevan, a man born to lead. Though bound by honor and committed to his sworn duty, Crevan cannot resist a taste of Raelynd's crimson lips when offered, and then another and another until the unlikely couple is entangled in both a public deception and each other's hearts. A delightful Scottish romp with an array of characters, I couldn't help liking even the supposed villain, who turns out to be a charmer. *Tempting the Highlander* is one of those cozy reads that leaves a smile on your face at the end of the book. Fresh Fiction. Reading like a delightful Shakespearean comedy, Sinclair's latest has humor, passion, and sexual tension. RT Book Reviews. *Creek Walk and Other Stories* Molly Giles, 1998-10-08. This evocative collection of 14 stories introduces women struggling to make their voices heard amid the cacophony of everyday life. Molly Giles portrays women blessed with the delightful ability to pick up and go on even if it's in the wrong direction.
