Behr,1996-04-04 Dreams, Jokes, and Songs Paul Thagard,2025-06-30 Dreams Jokes and Songs explores the nature and
mechanisms of consciousness from the perspectives of neuroscience and philosophy Thagard proposes the NBC Neural
representation Binding Coherence and Competition theory as a comprehensive explanation for human consciousness He
addresses external perceptions such as smell internal sensations such as hunger emotions such as loneliness and abstract
thoughts such as the self The book explains how complex conscious experiences emerge from the interactions of neural
mechanisms It highlights the integration of neural and cultural factors showing how consciousness results from both
biological processes and social influences It uses ideas about neural representation and coherence to produce powerful new
theories of dreaming humor and musical experience Other applications include religion morality sports romantic chemistry
and drugs Consciousness has many psychological functions especially action focus combining senses with emotions and
increasing social understanding Chapters also explore awareness of time consciousness in non human animals the feasibility
of machine consciousness and how NBC compares to alternative theories NBC justifies attributing some kinds of
consciousness to advanced animals such as mammals and birds and maybe even to fish crabs and bees but not to plants
bacteria or rocks Thagard s work bridges the gap between scientific mechanisms and the qualitative nature of experience
offering a new materialist solution to the mind body problem **Smell of Apples B Special** Mark Behr,1997-04-01
