Smoking, Drinking, and Illicit Drug Use Among American Secondary School Students, College Students, and Young Adults, 1975-1991: Secondary school students Lloyd Johnston, Patrick M. O'Malley, Jerald G. Bachman, 1992

Smoking, Drinking and Drug Use Among Young People in England in 2000 Harriet Becher, 2001

The main purpose of this survey was to monitor smoking drinking and drug use amongst secondary school children aged 11 15 Information was obtained from more than 7 000 pupils in 225 schools throughout England and Wales during the autumn term of 2000 Key findings include 10% of this group smoked at least one cigarette a week which represents a marginal increase on the 1999 figure 12% of girls were regular smokers compared to 9% of boys 18% of 11 15 year olds usually had an alcohol drink at least weekly a figure that has remained fairly steady in recent years pupils had a high awareness level of illegal drugs with 61% having been offered drugs by the age of 15 years

The Development and Maintenance of Smoking, Drinking and Other Drug Use Among Dublin Post-primary Pupils Joel W. Grube, Mark Morgan, 1990

Drug Use, Smoking and Drinking Among Young People in England in 2001 Sarah Blenkinsop, 2002

The main purpose of this survey is to monitor smoking drinking and drug use amongst secondary school children aged 11 15 years Information has been obtained from more than 9 000 pupils in 285 schools throughout England and the 2001 survey focuses on drug use Due to changes in question format the estimates of drugs taking are not compatible with those of previous surveys Key findings include that 29 per cent of the overall sample had ever tried one or more drugs 20 per cent had taken drugs in the last year and 12 per cent had done so within the last month with boys slightly more likely than girls to have taken drugs Figures rise as pupils get older with 48 per cent of 15 year olds having tried drugs and 29 per cent having taken them in the last year Cannabis was the most widely taken drug Reported levels of misuse of volatile substances such as glue sniffing were much higher than in previous surveys although this may be due to change in question format

The Oxford Handbook of Adolescent Substance Abuse Robert A. Zucker, Sandra A. Brown, 2019-08-01 Adolescent substance abuse is the nation's 1 public health problem It originates out of a developmental era where experimentation with the world is increasingly taking place and where major changes in physical self and social relationships are taking place These changes cannot be understood by any one discipline nor can they be described by focusing only on the behavioral and social problems of this age period the characteristics of normal development or the pharmacology and addictive potential of specific drugs They require knowledge of the brain's systems of reward and control genetics psychopharmacology personality child development psychopathology family dynamics peer

group relationships culture social policy and more Drawing on the expertise of the leading researchers in this field this Handbook provides the most comprehensive summarization of current knowledge about adolescent substance abuse The Handbook is organized into eight sections covering the literature on the developmental context of this life period the epidemiology of adolescent use and abuse similarities and differences in use addictive potential and consequences of use for different drugs etiology and course as characterized at different levels of mechanistic analysis ranging from the genetic and neural to the behavioural and social Two sections cover the clinical ramifications of abuse and prevention and intervention strategies to most effectively deal with these problems The Handbook's last section addresses the role of social policy in framing the problem in addressing it and explores its potential role in alleviating it

Smoking, Drinking, and Drug Use in Young Adulthood Jerald Bachman, 2013 Why do some young adults substantially change their patterns of smoking drinking or illicit drug use after graduating from high school In this book the authors show that leaving high school and leaving home create new freedoms that are linked to increases in the use of cigarettes alcohol marijuana and cocaine They also show that marriage pregnancy and parenthood create new responsibilities that are linked to decreases in drug use The research is based on more than 33 000 young people followed from high school through young adulthood by the nationwide Monitoring the Future project Every two years participants reported on their drug use as well as their schooling employment military service living arrangements marriages pregnancies parenthood and even their divorces The unique qualities of this research large nationally representative samples follow ups extending up to 14 years beyond high school and multiple approaches to analysis and data presentation allowed the examination of several important influences simultaneously while retaining much of the rich detail encountered in the real world On the whole the results are encouraging suggesting that the potentials for change and improvement during the transition to adulthood are as important as the detrimental effects of problem behavior in adolescence This research is a must read for anyone concerned with how new freedoms and responsibilities impact adolescents young adults and the use of licit and illicit drugs

Health, 2006

Preventing Alcohol Abuse Among Adolescents Gayle M. Boyd, Jan Howard, Robert A. Zucker, 1994 Organized in terms of an implicit phases model this special issue begins with two analyses of risk and protective factors that influence adolescent drinking patterns over time without the intrusion of deliberate intervention The remaining articles focus almost entirely on intervention research studies that test or evaluate intervention strategies in terms of their impact or potential impact on alcohol use and abuse by adolescents They are organized in terms of a micro macro environmental perspective moving from the smaller microcosm of the family through school settings communities and large governmental jurisdictions The papers in this issue lay the foundation for future avenues of inquiry and highlight some very important emergent research themes It is clear that family systems are attracting attention as potential environments for preventive interventions Historically families have been perceived as sources of alcohol problems and targets of treatment Now they are being viewed as possible protective systems and settings for

deliberate intervention before alcohol related problems actually occur
