Smell The Secret Seducer:

Smell P. A. Vroon, Anton van Amerongen, Hans de Vries, 1997 Explores how some cultures value the sense of smell while others see it as evidence of decadence or barbarism and others try to cleanse the air of any pungent smells at all

Revelations in Air Jude Stewart, 2021-10-26 An extraordinary strange and startlingly beautiful exploration of smell the least understood of our five senses The nose on your face is the Buckingham Palace Guard of your body the maitre d of all taste as well as the seducer of your imagination and memory and Jude Stewart has charmed them all into a wicked poetic and illuminating tour of their mysterious domains Jack Hitt author of *Bunch of Amateurs* Overlapping with taste yet larger in scope smell is the sense that comes closest to pure perception Smell can collapse space and time unlocking memories and transporting us to worlds both new and familiar Yet as clearly as each of us can recognize different smells the bright tang of citrus freshly sharpened pencils parched earth after rain few of us understand how and why we smell In *Revelations in Air* Jude Stewart takes us on a fascinating journey into the weird and wonderful world of smell Beginning with lessons on the incredible biology and history of how our noses work Stewart teaches us how to use our noses like experts Once we re properly equipped and ready to sniff Stewart explores a range of smells from lavender cut grass and hot chocolate to cannabis and old books using smell as a lens into art history science and more With an engaging colorful design and exercises for readers to refine their own skills *Revelations in Air* goes beyond science or history or chemistry it s a doorway into the surprising pleasurable and unfamiliar landscape of smell

The Body Electric James Geary, 2002 Marie a sixty three year old Belgian woman has been totally blind since the age of fifty seven But now thanks to electrodes implanted around her right optic nerve she can see lights shapes and colors again Marie is one of a

handful of people around the world who have had computer chips implanted in their bodies to extend enhance or repair their senses The idea of actually melding man and machine still seems futuristic unlikely and a little scary But in *The Body Electric* James Geary examines the startling possibilities opened up by the merger of the biological and the technological This remarkable convergence holds the promise of restoring sight to the blind and mobility to the paralyzed It might also provide us with bionic senses such as the ability to see infrared radiation or feel objects at a distance By linking neurons in the brain directly to silicon chips scientists are also exploring the possibility of creating virtual eyes ears and limbs on the Internet and allowing people to control appliances by thought alone Machines too are getting silicon senses Researchers are endowing computers with the ability to see hear smell taste touch and conceivably think *The Body Electric* offers an accessible and astute survey of this exciting area of research with its potential commercial medical and military applications Drawing on fields as diverse as artificial intelligence and biology *The Body Electric* asks Are you any less you after a bionic implant If all of our senses are electronically enhanced how will we tell the difference between virtual reality and the actual world Will it matter The merger of our technology and ourselves is already beginning to change the way we see hear smell taste touch and think about the world opening the doors of perception just another crack
