ANDRE BETEILLE

SOCIOLOGY AND SOCIAL ANTHROPOLOGY

Q. Examine the relationship between Sociology and Social Anthropology with special reference to the Indian Context.

The book "The Six Essays in Comparative Sociology" by "Andre Beteille" was published in 1974. It explores important topics in sociology and anthropology and relates them to contemporary Indian peasant society. Its first chapter "Sociology and Social Anthropology" examines the relationship between the two disciplines and cites the commonalities as well as the distinctions between them.

According to Andre Beteille, it is useful to examine the relationship between sociology and social anthropology as it has taken shape over time in order to see more clearly the work done by scholars in these fields in India today. He believes that a purely formal discussion of the subject will not be very useful any longer: a discussion at this stage will serve a purpose only if it creates a deeper awareness of the work in which we are actually engaged.

Beteille believes that we should take a critical look at the prevailing division of work among students of human society and culture. He states that one might feel that ideally this division of work should be the same throughout the world but we know that in reality this is not the case. The difference between sociology and social anthropology is not the same in France and Britain. Anglophone countries have maintained a distinction between the two which was sharpest in the period between the two World Wars.

He further states that the division of labour between Sociology and Social Anthropology emerged in Britain or United States under specific historic conditions and was then Transmitted to other countries where conditions were different. A proper division of work among students of human society can be established only on the basis of their ultimate academic objectives and their actual academic concerns. But in dealing with the relationship between Sociology and

Moeller,2017-10-10 Robert Moeller investigates the German peasantry's rejection of the Weimar Republic in the 1920s and provides a new interpretation of Catholic peasant conservatism in western Germany According to Moeller rural support for conservative political solutions to the troubled Weimar Republic was the result of a series of severe economic jolts that began in 1914 and continued unabated until 1933 During the late nineteenth century peasant farmers in the Rhineland and Westphalia adjusted their production to a capitalist market and enjoyed an unprecedented period of prosperity that lasted until the outbreak of World War I After August 1914 peasant producers confronted state intervention in the agricultural sector regulation of prices and markets and the subordination of agrarian interests to the demands of urban consumers A controlled economy for many agricultural products continued into the postwar period Focusing on the Catholic peasantry Moeller shows that peasant rejection of the Weimar Republic was firmly grounded in the immediate circumstances of the war economy and the uneven process of postwar recovery He challenges the dominant view that rural support for conservative political solutions was primarily the product of the peasantry's hostility toward industrial capitalism and of long term social and political affinities dating from the nineteenth century Moeller's findings show that conservative agrarian ideology was carefully formulated in response to the specific peasant grievances that originated in this period of continuing economic and political crisis Originally published in 1986 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value Narratives from the Margins Sanjukta Das Gupta,Raj Sekhar Basu,2012 Adivasis have principally been studied in the context of rebellion

environmental history and the politics of identity However preoccupations with definitions and notions of identity while important in themselves tend to shift attention away from the inner lives of these communities This book deals with different aspects of the histories of adivasi communities from Rajasthan in the west to Bengal and Orissa in the east The essays in this book discuss a range of issues affecting the socio economic and cultural life of adivasis and explore the long term continuities and discontinuities between different political regimes They also reflect some of the new concerns that have come up relating to methodology and sources historiography and colonial concerns the impact of missionaries gender issues the agrarian situation famines and migration Some of the issues addressed in this volume are the genesis and development of tribal studies in India during the colonial period the peasantization of adivasi groups and their assimilation within the Hindu caste fold as reflected in Tulsidas Ramcharitmanas the work of the Protestant missions among the Santals of Chotanagpur the social and ritual relations between the Bhils and the Rajput ruling dynasties of Dungarpur in southern Rajasthan the aspect of agrarian change among the Hos of Singhbhum the factors behind the migration from Chotanagpur its nature and organization and its impact upon the adivasi village community the question of women s agency in colonial Chotanagpur and an exploration of land rights witchcraft employment patterns and how women challenged patriarchy in their everyday lives and the impact of globalisation and liberalization upon adivasis in contemporary India The book will be of use to students and scholars of history anthropology and sociology and also to policy planners
