Karl W. Giberson, Donald A. Yerxa

Skeptics And True Believers The Exhilarating Connection Between Science And Religion:

Skeptics and True Believers Chet Raymo, 1999-04-01 A noted science writer argues passionately and persuasively that science and religion are mutually reinforcing ways of experiencing the world and that words such as God grace sacred and spirituality can retain currency in an age of science once they have been stripped of their archaic meanings

Skeptics and True Believers : the Exhilarating Connection Between Science and Religion Chet Raymo, 1998 Science has proved a spectacularly successful way of knowing the world Yet many people reject one of its basic points we are ephemeral parts of a silent universe that is vastly larger than ourselves Although Chet Raymo disapproves of fundamentalist and New Age beliefs and is skeptical of traditional religion he argues that science and religion can be mutually reinforcing ways of experiencing the world In his view words like God grace soul and sacrament can retain currency in an age of science Using dynamic and thought provoking stories a hilarious episode of alien abduction that didn't happen or a walk on fire Raymo argues that science should be embraced by religion instead of distrusted He also shows that the wondrous universe revealed by science can hardly fail to excite religious feeling There are no miracles but one he writes the miracle of the creation itself which is the primordial source of all religious feeling

Sceptics and True Believers Chet Raymo, 1998 A passionate inquisitive statement that science and religion can mutually reinforce the way we experience the world

Skeptics and True Believers Chet Raymo, 2009-05-26 Years ago noted science teacher and writer Chet Raymo embarked upon his own quest to reconcile the miracle stories he learned as a child with the science he learned as an adult Skeptics and True Believers is the culmination of that search a passionate ever inquisitive statement that science and religion can mutually reinforce the way we experience the world Acknowledging that the scientific and the spiritual communities are increasingly split Raymo builds strong bridges between them He illustrates his argument with an array of thought provoking stories such as the remarkable migratory flight of a small bird called the red knot the long glorious glide of the Comet Hyakutake across the night sky a hilarious alien abduction that didn't happen Together they are compelling evidence that religion should embrace the reliable knowledge of the world that science provides while at the same time science should respect and nourish humankind's need for spiritual sustenance Miracles are explainable Raymo paraphrases the writer Tim Robinson it is the explanations that are miraculous For anyone drawn to reflect on life's meaning and purpose Chet Raymo's uncompromising skepticism and reverence for mystery will affirm and inspire

Species of Origins Karl W. Giberson, Donald A. Yerxa, 2002-10-09 In Species of Origins Karl W. Giberson and Donald A. Yerxa examine America's controversial conversation about creation and evolution While noting that part of the discord stems from the growing cultural and religious diversity of the United States they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely modern naturalistic science and traditional Judeo-Christian religions

Christianity and Science Haught, John F., 2014-04-10 There is nothing in Christian faith that should make one

afraid of science's widening and deepening knowledge. No matter how enormous the picture of the natural world turns out to be, it can never surpass the infinity we have always attributed to God. In this work John Haught, a leading Catholic theological voice in the study of science and religion, offers his most systematic theological reflections on the relation between Christian revelation and the unfolding story of the universe. In the face of recent discoveries, some maintain their faith by clinging to a pre-scientific world view; others conclude that perhaps the universe has outgrown the biblical God who is said to be its creator. For Haught, however, exploration of the three infinities—the immense, the infinitesimal, and the complex—serves as an invitation to an unprecedented appreciation for the grandeur of God's creation, Christ, and redemption.

The Challenge of Creation Natan Slifkin, Nosson Slifkin, 2006 The Challenge of Creation is a completely revised and vastly expanded edition of The Science Of Torah. That work was widely hailed as the best book of its kind for its honesty and thoroughness of approach. The Challenge of Creation builds upon its approach, covering more issues and in greater depth. Carefully, methodically, and eschewing sensationalistic or dogmatic claims in favor of reasoned analysis, it shows how some of the greatest Jewish thinkers explained Judaism and Genesis in a way that complements modern science rather than conflicts with it. The Challenge of Creation is an invaluable resource for anyone grappling with conflicts between science and religion. It is a profound work that is sure to become a classic.

Theological Incorrectness Jason Slone, 2007-12-03 Why do religious people believe what they shouldn't? Not what others think they shouldn't believe, but things that don't accord with their own avowed religious beliefs. Jason Slone terms this phenomenon theological incorrectness. He argues that it exists because the mind is built in such a way that it's natural for us to think divergent thoughts simultaneously. Human minds are great at coming up with

innovative ideas that help them make sense of the world he says but those ideas do not always jibe with official religious beliefs From this fact we derive the important lesson that what we learn from our environment religious ideas for example does not necessarily cause us to behave in ways consistent with that knowledge Slone presents the latest discoveries from the cognitive science of religion and shows how they help us to understand exactly why it is that religious people do and think things that they shouldn't
