Skene, 1986 *Faecal Sludge Management* Linda Strande, Damir Brdjanovic, 2014-08-14 It is estimated that literally billions of residents in urban and peri urban areas of Africa Asia and Latin America are served by onsite sanitation systems e g various types of latrines and septic tanks Until recently the management of faecal sludge from these onsite systems has been grossly neglected partially as a result of them being considered temporary solutions until sewer based systems could be implemented However the perception of onsite or decentralized sanitation technologies for urban areas is gradually changing and is increasingly being considered as long term sustainable options in urban areas especially in low and middle income countries that lack sewer infrastructures This is the first book dedicated to faecal sludge management It compiles the current state of knowledge of the rapidly evolving field of faecal sludge management and presents an integrated approach that includes technology management and planning based on Sandecs 20 years of experience in the field Faecal Sludge Management Systems Approach for Implementation and Operation addresses the organization of the entire faecal sludge management service chain from the collection and transport of sludge and the current state of knowledge of treatment options to the final end use or disposal of treated sludge The book also presents important factors to consider when evaluating and upscaling new treatment technology options The book is designed for undergraduate and graduate students and engineers and practitioners in the field who have some basic knowledge of environmental and or wastewater engineering Authors Linda Strande Eawag Switzerland Mariska Ronteltap UNESCO IHE Institute for Water Education Delft The Netherlands and Damir Brdjanovic UNESCO IHE Institute for Water Education Delft The Netherlands Reuse of Sludge and Minor Wastewater Residuals Alice Outwater, Berrin
