Husain,1995-04-04 Just before the end of the 1990 1991 Gulf War more than 700 wells in Kuwaiti oil fields were set on fire Several international companies and scientific organisations were involved in extinguishing the fires and in assessing the impact of this major environmental incursion Kuwaiti Oil Fires Regional Environmental Perspectives summarises these effects The topics covered include the application of remote sensing techniques to determine the location of wells on fire and plume movement air quality and particulate monitoring by ground stations and aircraft measurements organic and inorganic constituents in the air use of modeling techniques to study dispersion characteristics of pollutants and deposition of soot and the efforts by the fire fighters in extinguishing fires and capping the wells A brief overview of the causes of the crisis and the role of regional and international groups in resolving the dispute is presented as well as some basic and useful statistics of the region covering general information on economic aspects and exploitation of oil resources in both Iraq and Kuwait Problems faced by the fire fighting teams the preparations made to overcome the problems and technology used in extinguishing the well fires are also discussed Numerous colour photographs are used to illustrate the problems encountered and the techniques involved in their solution **Kuwait Oil Fires** Christine Nyandat,2020-09-09 Academic Paper from the year 2020 in the subject Business economics Industrial Management Humboldt University of Berlin language English abstract Oil well flames allude to gas or oil wells that are consuming Oil well flames can happen because of human activities for example illegal conflagration or mishaps or regular occasions for example lightning These flames cause ecological impacts and discharge lethal contaminations into the air which result in wellbeing related issues In this way the Oil Flames were brought about by the Iraqi Military Powers setting a flame to 605 to 732 Oil Wells The flames were made in January and February 1991 and the principal Well flames were quenched in April 1991 and the keep going one on November 6 1991 S There was a conflict amongst Iraq and Kuwait over some boring in oil However Kuwait was delivering oil over the cutoff points by the Association of the Oil Exporting Nations or only OPEC for short The Environmental and Health Impact of the Kuwaiti Oil Fires University of Birmingham. Government Accountability Office (G,U. S. Government Accountability Office (,2013-06 Pursuant to a congressional request GAO reviewed the adequacy of a 1991 interagency report on the Kuwait oil fires focusing on the report s findings that 1 there was no significant acute health risk from the pollution levels to people with normal respiratory capacity and 2 more data are needed to determine long term health risks GAO found that 1 the report s findings were reasonable since the study s scope was limited the study team qualified its findings and conclusions and the team recognized the need for more data to determine long term health risks 2 additional monitoring indicated that Kuwait s air quality has been within standards except for high particulate levels and 3 the Army and the Environmental Protection Agency have initiated GAO endorsed actions to assess long term health risks

The Gulf War Aftermath M. Sadiq,J.C. McCain,2012-12-06 In 1962 Rachel Carson warned of the consequences of man s pollution in her book *Silent Spring* a book that some feel marks the real beginning of our environmental awareness *Silent Spring* told of the consequences of our increasing pesticide use to birds Almost 30 years after her warning the western Arabian Gulf experienced its silent spring when approximately 100 000 to 250 000 waterbirds died along with millions of other organisms due to the massive oil spill that resulted due to Gulf war The magnitude of our environmental problems has continued to grow during the last thirty years to a point where even the doomsday environmentalists could hardly have envisioned back in 1962 It seems the death of yet uncounted thousands of humans was not sufficient for Saddam Husain His desire for power and infamy led him to unleash environmental war on mankind At the end of the Gulf war he set ablaze the oil fields of Kuwait and released more oil into the sea than had been spilled at any time throughout history These actions were despicable and an affront to civilized man A quality environment should be a right of all mankind and to wage war by deliberately polluting the earth cannot be tolerated
