Driving Spaces

Peter Merriman, 2011-07-22 Peter Merriman traces the social and cultural histories and geographies of driving spaces through an examination of the design construction and use of England's M1 motorway in the 1950s and 1960s. A first of its kind academic study examining the production and consumption of the landscapes and spaces of a British motorway. An interdisciplinary approach engaging with theoretical and empirical work from sociology, history, cultural studies, anthropology, and geography. Contains 38 high quality illustrations. Based on extensive original archive work. **Writing Worlds** Trevor J. Barnes, James S. Duncan, 2013-12-19 Writing Worlds represents the first systematic attempt to apply poststructuralist ideas to landscape representation. Landscape, city, countryside, and wilderness is explored through the discourse of economics, geopolitics, and urban planning. Travellers' descriptions, propaganda maps, cartography, and geometry, poetry, and painting. The book aims to deconstruct geographical representation in order to explore the dynamics of power in the way we see the world.

Continuous Productive Urban Landscapes Andre Viljoen, Joe Howe, 2012-05-04 This book on urban design extends and develops the widely accepted compact city solution. It provides a design proposal for a new kind of sustainable urban landscape. Urban Agriculture. By growing food within an urban rather than exclusively rural environment, urban agriculture would reduce the need for industrialized production, packaging, and transportation of foodstuffs to the city-dwelling consumers. The revolutionary and innovative concepts put forth in this book have potential to shape the future of our cities. Quality of life within them. Urban design is shown in practice through international case studies, and the arguments presented are supported by quantified economic, environmental, and social justifications. **Landscape and the Ideology of Nature**

in Exurbia K. Valentine Cadieux, Laura Taylor, 2013-05-07 This book explores the role of the ideology of nature in producing urban and exurban sprawl. It examines the ironies of residential development on the metropolitan fringe where the search for nature brings residents deeper into the world from which they are imagining their escape. Federal Express, technologically mediated communications, global supply chains, and the anonymity of the global marketplace, and where many of the central features of exurbia—very low density residential land use, monster homes, and conversion of forested or rural land for housing—contribute to the very problems that the social and environmental aesthetic of exurbia attempts to avoid. The volume shows how this contradiction to live in the green landscape and to protect the green landscape from urbanization gets caught up and represented in the ideology of nature and how this ideology in turn constitutes and is constituted by the landscapes being urbanized. **Placing Nature** Joan Nassauer, 2013-02-22 Landscape ecology is a widely influential approach to

looking at ecological function at the scale of landscapes, and accepting that human beings powerfully affect landscape pattern and function. It goes beyond investigation of pristine environments to consider ecological questions that are raised by patterns of farming, forestry, towns, and cities. Placing Nature is a groundbreaking volume in the field of landscape ecology. The

result of collaborative work among experts in ecology philosophy art literature geography landscape architecture and history Contributors asked each other What is our appropriate role in nature How are assumptions of Western culture and ingrained traditions placed in a new context of ecological knowledge In this book they consider the goals and strategies needed to bring human dominated landscapes into intentional relationships with nature articulating widely varied approaches to the task In the essays novelist Jane Smiley ecologist Eville Gorham and historian Curt Meine each examine the urgent realities of fitting together ecological function and culture philosopher Marcia Eaton and landscape architect Joan Nassauer each suggest ways to use the culture of nature to bring ecological health into settled landscapes urban geographer Judith Martin and urban historian Sam Bass Warner geographer and landscape architect Deborah Karasov and ecologist William Romme each explore the dynamics of land development decisions for their landscape ecological effects artist Chris Faust s photographs juxtapose the crass and mundane details of land use with the poetic power of ecological pattern Every possible future landscape is the embodiment of some human choice Placing Nature provides important insight for those who make such choices ecologists ecosystem managers watershed managers conservation biologists land developers designers planners and for all who wish to promote the ecological health of their communities **Girmitiyas and the Global Indian Diaspora**

Ashutosh Kumar,Crispin Bates,2024-07-04 Examines the challenges faced by migrant Indian labourers who settled in the former European plantation colonies and their struggles to adapt and forge an identity in these places far from their homes

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
