The Twin Sister Planets Venus and Earth Robert J. Malcuit, 2015 This book explains how it came to be that Venus and Earth while very similar in chemical composition zonation size and heliocentric distance from the Sun are very different in surface environmental conditions It is argued here that these differences can be accounted for by planetoid capture processes and the subsequent evolution of the planet satellite system Venus captured a one half moon mass planetoid early in its history in the retrograde direction and underwent its fatal attraction scenario with its satellite Adonis Earth on the other hand captured a moon mass planetoid Luna early in its history in prograde orbit and underwent a benign estrangement scenario with its captured satellite

National Program of Inspection of Dams United States. Army. Corps of Engineers, 1975 Mayakovsky Edward James Brown, 2015-03-08 An absorbing portrait of an extraordinary man an analysis of the work of a great Russian poet and the evocation of a crucial period in Russian cultural history all are combined in Edward J Brown's literary biography of Vladimir Mayakovsky It is the only book to reveal the whole Mayakovsky not just aspects of his tortured personality or artistic work and will be immediately recognized as definitive Mayakovsky contributed to the cultural life of Soviet Russia not only as a lyric poet but as a playwright graphic artist and satirist of the conventional art forms of his day By examining his art in terms of his life Edward Brown shows how intensely personal it was and how bound up in the literary and political history of his time The intellectual turmoil of the period is skillfully re created especially the nature ambience and personalities of Russian futurism Above all the book reveals the man a committed Bolshevik and a dedicated artist but also a hypochondriac compulsive gambler and eventual suicide Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

approach in which the whole human family in the search for a sustainable and integral development unites to protect our common home Pollution climate change loss of biodiversity and exploitation of resources will grow exponentially if we do not change our direction in the short term We need an environmental conversion Pope Francis says For this to be possible we need a truly ecological education to create a renewed awareness and a renewed conscience In an exclusive new essay that concludes Our Mother Earth Pope Francis develops a theology of ecology in a profoundly spiritual discourse This final chapter offers thoughts on how a Christian vision of care for the earth goes well beyond a secular vision of ecology This means that it is for humanity s capacity for communion to condition the state of creation It is therefore humanity s destiny to determine the destiny of the universe *A New Theory of the Earth* William Whiston,1737
