Perspectives in Human Growth, Development and Maturation Parasmani Dasgupta,Roland Hauspie,2013-03-14 One morning in 1969 out of the blue I received a letter which both distressed and astonished me It was from a Prof S R Das in Calcutta who requested me to accept for eventual analysis a mountain of anthropometric data he had accumulated as he was ill and did not expect to survive to analyse it himself The data provided the astonishment twenty two anthropometric characters recorded every six months or a year over a period of 14 years in a mixed longitudinal study of some 560 children aged six months to twenty years Most were in families with siblings also in the study and every child was measured every time by S R Das himself The

archive was unique combining the personal anthropometry of R H Whitehouse in the Harpenden Growth Study and the family approach of the Fels Growth Study This was a study of which neither I nor anyone of my acquaintance had heard Even in India Prof Das work was scarcely known It turned out Das was a scholarly man quiet and unassuming absolutely committed to his Sarsuna Barisha Growth Study just the obverse of the professional showman Clearly this was not a request I could refuse although I already had in hand enough projects to occupy Siva himself
