Human-Centred Software Engineering Regina Bernhaupt, Peter Forbrig, Jan Gulliksen, Marta Kristín Lárusdóttir, 2010-10-06 The conference series HCSE Human Centred Software Engineering was established four years ago in Salamanca HCSE 2010 is the third working conference of IFIP Working Group 13.2 Methodologies for User Centered Systems Design The goal of HCSE is to bring

together researchers and practitioners interested in strengthening the scientific foundations of user interface design examining the relationship between software engineering and human computer interaction and focusing on how to strengthen user centered design as an essential part of software engineering processes As a working conference substantial time was devoted to the open and lively discussion of papers The interest in the conference was positive in terms of submissions and participation We received 42 contributions that resulted in 10 long papers 5 short papers and 3 poster papers The selection was carried out carefully by the International Program Committee The result is a set of interesting and stimulating papers that address such important issues as contextual design user aware systems ubiquitous environments and usability evaluation The final program of the conference included a keynote by Liam Bannon with the title Approaches to Software Engineering A Human Centred Perspective This talk raised a lot of interesting questions for IFIP WG 13.2 and might have had some impact for participants to become a member of the working group We hope that participants considered HCSE 2010 as successful as its two predecessors in terms of interesting discussions and new ideas for scientific cooperation

Christen, E. Hofmann, 2012-12-06 In the mid 1980s the European Journal of Biochemistry set out to publish review articles The enterprise proved successful resulting in high level reviews written by well known scientists appearing in the Journal The reviews represent emerging and rapidly growing fields of research in fundamental as well as applied areas of biochemistry such as medicine biotechnology agriculture and nutrition Novel methodological and technological approaches which stimulate biochemical research are also included The authors of the reviews are explicitly asked to be critical selective evaluative and interdisciplinarily oriented The reviews should encourage young scientists to think independently and creatively and inform active investigators about the state of the art in a given field *Membrane Protein-Cytoskeleton Interactions*, 1996-11-21 The plasma membrane acts as both a boundary and a site of exchange between the outside and the inside of a cell The cytoskeleton plays essential roles in delineating membrane protein distributions in defining structural and functional domains in the plasma membrane and in regulating membrane protein and ultimately cell function This volume reviews the regulation of membrane protein distribution organization and function at the plasma membrane by the cytoskeleton Discussions also include the roles of

cytoskeleton in the structural and functional organization of membranes and membrane proteins with emphasis on key problems the current status of understanding experimental approaches and future directions *MultiMedia Modeling* Yong Man Ro, Wen-Huang Cheng, Junmo Kim, Wei-Ta Chu, Peng Cui, Jung-Woo Choi, Min-Chun Hu, Wesley De Neve, 2019-12-27 The two volume set LNCS 11961 and 11962 constitutes the thoroughly refereed proceedings of the 25th International Conference on MultiMedia Modeling MMM 2020 held in Daejeon South Korea in January 2020 Of the 171 submitted full research papers 40 papers were selected for oral presentation and 46 for poster presentation 28 special session papers were selected for oral presentation and 8 for poster presentation in addition 9 demonstration papers and 6 papers for the Video Browser Showdown 2020 were accepted The papers of LNCS 11961 are organized in the following topical sections audio and signal processing coding and HVS color processing and art detection and classification face image processing learning and knowledge representation video processing poster papers the papers of LNCS 11962 are organized in the following topical sections poster papers AI powered 3D vision multimedia analytics perspectives tools and applications multimedia datasets for repeatable experimentation multi modal affective computing of large scale multimedia data multimedia and multimodal analytics in the medical domain and pervasive environments intelligent multimedia security demo papers and VBS papers
