Advancing Relational Leadership Research Mary Uhl-Bien, Sonia M. Ospina, 2012-10-01 Leaders and followers live in a relational world a world in which

leadership occurs in complex webs of relationships and dynamically changing contexts Despite this our theories of leadership are grounded in assumptions of individuality and linear causality If we are to advance understandings of leadership that have more relevance to the world of practice we need to embed issues of relationality into leadership studies This volume addresses this issue by bringing together for the first time a set of prominent scholars from different paradigmatic and disciplinary perspectives to engage in dialogue regarding how to meet the challenges of relationality in leadership research and practice Included are cutting edge thinking heated debate and passionate perspectives on the issues at hand The chapters reveal the varied and nuanced treatments of relationality that come from authors alternative paradigmatic entity constructionist critical views Dialogue scholars reacting to the chapters engage in spirited debate regarding the commensurability or incommensurability of the paradigmatic approaches The editors bring the dialogue together with introductory and concluding chapters that offer a framework for comparing and situating the competing assumptions and perspectives spanning the relational leadership landscape Using paradigm interplay they unpack assumptions and lay out a roadmap for relational leadership research A key takeaway is that advancing relational leadership research requires multiple paradigmatic perspectives and scholars who are conversant in the assumptions brought by these perspectives The book is aimed at those who feel that much of current leadership thinking is missing the boat in today s complex relational world It provides an essential resource for all leadership scholars and practitioners curious about the nature of research on leadership both those with much research exposure and those new to the field *Rhythms of Academic Life* Peter J.

Dulebohn,2023-03-01 People have long made invidious distinctions between individuals e g the clean and the unclean good and evil black and white sacred and profane etc Smith 1996 and these distinctions affect the degree to which individuals experience prejudice unfair discrimination and oppression in organizations and society as a whole As a result there has been an increased interest in research on these distinctions and unfair discrimination in organizations Despite this research most of the studies have focused on only a subset of minorities including African Americans women older workers and people with physical disabilities Dipboye Colella 2005 A number of other minorities have been forgotten or neglected by organizational researchers including people with neurological or psychological disabilities veterans Native Americans people with a criminal history and those who come from low socioeconomic or poor backgrounds Thus the primary purposes of this issue of Research in HRM is to foster research on Forgotten Minorities or those who are members of groups that have been excluded from organizations and neglected by organizational research In view of these arguments this issue a presents a brief review of the organizational research on the exclusion and repudiation of people who are forgotten minorities b offers directions for future research on these outgroup members and c considers key implications for practice that can facilitate the inclusion of forgotten minorities in organizations

Flexible Lives Stefanie Reissner,Michal Izak,2025-08-07 This geographically and methodologically diverse volume shines the spotlight on a variety of flexible working practices beyond the predominantly Western perspective and zooms in on the gendered aspects of flexible working The increasing use of flexible work arrangements has decoupled work from time and space making the world of work and home increasingly fluid and challenging to manage The Covid 19 pandemic in particular has been a catalyst for questioning accepted norms of where when and how work takes place This book seeks to explore the impact which this reshaping of traditional modes of working has had on workplace interactions and relationships as well as on managing the boundaries between familial and working lives In this way this collection contributes to a wider dialogue concerning the flexibility challenges encountered by white collar workers which is needed now more than ever This book will be relevant to scholars practitioners and policymakers in the fields of gender studies organizational behavior human resources and labor economics It will be particularly useful for those examining the impact of remote work the future of work organizational culture and the social and economic implications of shifting work practices The chapters in this book
