Professional Practice in Engineering and Computing Riadh Habash,2019-03-18

This book has been developed with an intellectual framework to focus on the challenges and specific qualities applicable to graduates on the threshold of their careers. Young professionals have to establish their competence in complying with multifaceted sets of ethical, environmental, social, and technological parameters. This competence has a vital impact on the curricula of higher education programs because professional bodies today rely on accredited degrees as the main route for membership. Consequently, this four-part book makes a suitable resource for a two-semester undergraduate course in professional practice and career development in universities and colleges. With its comprehensive coverage of a large variety of topics, each part of the book can be used as a reference for other related courses where sustainability, leadership, systems thinking, and professional practice are evident and increasingly visible.

Features: Identifies the values that are unique to the engineering and computing professions and promotes a general understanding of what it means to be a member of a profession. Explains how ethical and legal considerations play a role in engineering practice. Discusses the importance of professional communication and reflective practice to a range of audiences. Presents the practices of leadership, innovation, entrepreneurship, safety, and sustainability in engineering design. Analyzes and discusses the contemporary practices of project management, artificial intelligence, and professional career development.

The Practical Real-Time Enterprise Bernd Kuglin, 2005-02-21

The basic idea of the real-time enterprise is to become quicker. A business which wants to become a real-time enterprise has to acquire three main abilities. Internal and external data is integrated quickly and in real time in a well-organized company data pool. Analyses of information in the company data pool can be obtained in real time across function boundaries and at the touch of a button. The number of working steps performed in batch mode is shifting dramatically in favor of immediate completion in real time. The issue of communications or real-time communications plays a special role here. Studies have shown that processing times sometimes double when necessary communication events are handled in batch mode in the business process and not in real time. In other words, when an activity cannot be completed and lies around for days because an urgently needed partner cannot be contacted. The necessity of acquiring these three abilities has implications for the process-related technical and organizational aspects of a business that are dealt with in detail in this book.

The Ventilator Project Srikant Sastri, Amitabha Bandyopadhyay, 2021-03-07

A raging pandemic, a dearth of life-saving equipment, and ninety days to manufacture a world-class ventilator. On 24 March 2020, a nationwide lockdown was imposed in India in the face of a formidable adversary, the Covid-19 pandemic. With the number of cases increasing exponentially, hospitals were faced with a dangerous shortage of life-saving equipment and personnel. In response to the imminent crisis, Amitabha Bandyopadhyay and Srikant Sastri formed the IIT Kanpur Ventilator Consortium as a task force to assist a young startup, Nocca Robotics, in building affordable, high-quality ventilators for India's cash-strapped hospitals. Under the mentorship of reputed industry leaders, the task force and the Nocca team worked tirelessly against unprecedented odds, trammelled by a ban on imports and telecommuting through Zoom and Whatsapp in the face of stringent lockdown.
