[Affective Sciences through the Chemical Senses](#) Géraldine Coppin, Valentina Parma, Bettina M. Pause, 2017-01-13 In people s minds smells flavors and affective phenomena are perceived as closely linked But is it genuinely the case The scientific study of this question is a rapidly expanding field both in healthy and in clinical populations Although still under studied in comparison to other sensory modalities chemical senses have proven to bring unique knowledge in the understanding of affective phenomena In this context this Research Topic is

aimed to offer a snapshot of the present knowledge and questions raised in this field Topics include but are not limited to affects elicited by odors and or flavors in different individuals contexts or cultures emotional potency of odors in guiding human behavior and cognition e g attention memory formation decisions and choices withdrawal and approach behavior affects communicated by body odors affect regulation disorders and chemosensory perception Studies on the biological underpinnings of these effects are also included The Multisensory Museum Nina Levent,Alvaro Pascual-Leone,2014-03-06 Recent research in the cognitive sciences gives us a new perspective on the cognitive and sensory landscape In The Multisensory Museum Cross Disciplinary Perspectives on Touch Sound Smell Memory and Space museum expert Nina Levent and Alvaro Pascual Leone professor of neurology at Harvard Medical School bring together scholars and museum practitioners from around the world to highlight new trends and untapped opportunities for using such modalities as scent sound and touch in museums to offer more immersive experiences and diverse sensory engagement for visually and otherwise impaired patrons Visitor studies describe how different personal and group identities color our cultural consumption and might serve as a compass on museum journeys Psychologists and educators look at the creation of memories through different types of sensory engagement with objects and how these memories in turn affect our next cultural experience An anthropological perspective on the history of our multisensory engagement with ritual and art objects especially in cultures that did not privilege sight over other senses allows us a glimpse of what museums might become in the future Education researchers discover museums as unique educational playgrounds that allow for a variety of learning styles active and passive exploration and participatory learning Designers and architects suggest a framework for thinking about design solutions for a museum environment that invites an intuitive multisensory and flexible exploration as well as minimizes physical hurdles While attention has been paid to accessibility for the physically impaired since passage of the Americans with Disabilities Act making buildings accessible is only the first small step in elevating museums to be centers of learning and culture for all members of their communities This landmark book will help all museums go much further

**William Lycan on Mind, Meaning, and Method** Mitchell Green,Jan G. Michel,2024-12-22 William Lycan is an internationally renowned American philosopher whose work since the late 1960s has been not only extensive but also influential particularly in the areas of philosophy of mind epistemology philosophy of language metaphysics and more recently metaphilosophy This contributed volume features high quality contributions by prominent or up and coming philosophers who critically examine many aspects of Lycan s work it also contains an essay by Lycan responding to these contributions In this way not only is the importance of William Lycan s work appreciated it is also made accessible for further research The book is also suitable for teaching purposes at universities **Smelling to Survive** Bill S. Hansson,2024-08-13 Smell is arguably the least understood sense yet it has always been a vital component of the human experience and that of all living creatures Smell has been used by plants and animals for millions of years to warn to attract to identify to navigate and

even to mislead Smelling to Survive explains some of these fascinating processes and explores how the past would have smelt quite different to our ancestors and how future technologies will further change the world of scents Along the way leading scientist Bill S Hansson recounts amazing stories from the world of olfactory research from the tobacco plant that excretes an alarm odour to mosquitos that cherish the smell of sweaty feet to lilies that imitate the fragrance of a dead horse Hansson explains why scientists are interested in the smell that surrounds teenage males and how climate change affects the smell of our environment He describes research trips to Christmas Island where crabs with particularly keen noses crack coconuts on the beach and outlines studies that reveal how penguins recognize their partner by their scent Born in Sweden the neuroethologist Bill S Hansson served as Vice President of the Max Planck Society and is currently Director of the Max Planck Institute for Chemical Ecology in Jena Germany and an honorary professor at Friedrich Schiller University His research centres on the question of how plants and insects communicate through scent *Smelling: The Key to Enlightenment* Clayton Tylor, 2024-10-15 The sense of smell has both an outer natural sense and an inner spiritual sense The inner sense corresponds to the faculty of discrimination It is developed through the practice of smelling while nose breathing This is different from mouth breathing because the interiors of the nostrils also correspond to the angelic or celestial sphere of Universal Love The celestial sphere is the affection of good It is all feeling Smelling while breathing quiets the mind chatter and lifts the consciousness to the rational or spiritual mind In that silence the affection of good shines through the physical body and expands out into the spiritual body We interpret it as the feeling of knowing but it is the birth of faith Not blind faith because each knowing moment fills our consciousness with more light from faith Through the affections of love radiating outwards as faith aligns us to the spiritual affections of good and truth They are charity for all and faith in humanity This is the affection of the Brotherhood of Mankind It is the feeling of mutual love manifesting now during this Age of Aquarius Each of us can do our part by bringing the energies into balance through meditation and by smelling while breathing

**Applied Olfactory Cognition** Gesualdo M Zucco, Benoist Schaal,Mats Olsson,Ilona Croy,2014-12-02 Foreword by Richard J Stevenson Macquarie University Australia It was long thought that the human nose might be able to discriminate somewhere in the order of 10 000 different odourants The recent

finding that the human nose can discriminate something like a trillion different smells serves as yet another reminder that we have again underestimated the capacity of our sense of smell Bushdid Magnasco Vosshall Keller 2014 This volume serves as a further corrective for anyone who should hold the view that olfaction is unimportant in human affairs The papers presented in this ebook carefully collated and overseen by Aldo Zucco Benoist Schaal Mats Olsson and Ilona Croy showcase a large number of quite different reasons for studying the applied side of olfaction and indeed human olfaction in general The 23 contributions presented here cover a broad range of topics which illustrate contemporary interests in our field Although with a strong applied focus a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed These range from considerations of olfactory perception memory expertise and priming right the way through to receptor genetics These contributions from many leading experts in the field will surely shape much of the applied work linking olfaction to disease which is a further focus of this ebook In respect to health and disease the chapters on aging pregnancy depression alcohol dependency and environmental odours present overviews and rich new data on many contemporary problems to which the study of olfaction is now contributing A particularly notable aspect of olfactory experience is the affective impact that odours can have on people and their lives The ebook covers some particularly intriguing aspects of work in this area with empirical studies investigating dissociations between wanting and liking stress reduction in the elderly mother infant bonding and the emotions that different odourants can evoke This affective line of work is nicely complemented by empirical studies on expertise the effect of odours on visual attention and the relationship between particular personality traits and interest in olfaction The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook with at least three of the chapters reporting data using neuroimaging including a particular intriguing study looking at recognition of odours in mixtures Finally the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine I hope that readers of this e book will be struck as I have been in reading its various chapters how much olfaction affects our lives and how the study of this sense can enrich it

The Top Books of the Year Smelly Science Body Odours The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have enthralled audiences this year. Smelly Science Body Odours : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
