13 legendary stories that have lived in people's memories for centuries. From the iconic story of Heer Ranjha, a love sacrificed by customs and betrayal to Sohni Mahiwal who risked her life for true love. Then there is Mirza Sahiban who is caught in a dilemma between family and love and Noori Jam Tamachi who shows that true love knows no caste. Not only is love burning but you will be taken to a deep dive into the story of Shah Hussain and Madho Lal as well as the life journey of Lal Shahbaz Qalandar, the great Sufi who spread love and courage against injustice. Mystery is also present in the curse of the Koh-i-Noor, the beautiful diamond that holds a nestapa as well as the story of a blind musician from Balochistan who can see the future through his rabab tones. You'll also meet giants from Gojal warriors of Derawar Fort to fairies from hidden caves in Kohistan who appear only to the pure soul. Written in a captivating narrative style, this book is a blend of living poetry, folk history, and universal values that remains relevant today. Each legend offers lessons about love, sacrifice, courage, and spirituality. Suitable for lovers of Eastern culture, literary connoisseurs, and seekers of meaning in classic stories.

Furnace of Creation, Cradle of Destruction Roy CHESTER, 2008-07-16. Over the past few years, devastating tsunamis off the coast of the Indian Ocean have killed hundreds of thousands of people. Even more alarmingly, scientists predict that these tsunamis, as well as a series of earthquakes and volcanic eruptions, may eventually threaten Hawaii, California, and Oregon. The cause of this trinity of natural disasters is plate tectonics. Perhaps the greatest advance made in the field of earth science, the plate tectonics theory argues that the surface of the Earth is broken into large plates which change in size and position over time. The edges of these plates rub against each other, causing earthquakes, volcanoes, and tsunamis that continue to inflict such intense destruction on the surface of our planet. In Furnace of Creation, Cradle of Destruction, renowned scientist Roy Chester reveals the fascinating history of this discovery and tells the enigmatic story of one of the great mysteries of our time: how the surface of our planet was created and how it has evolved. From the early discoveries of Sir Francis Bacon to the beginnings of geology and the controversy surrounding the theory of continental drift, this impeccably researched book reveals the evolution of a vital scientific theory. Lucid and compelling, this book offers a long-awaited explanation of the underlying forces that shape our world.

Canadian Slavonic Papers, 1974. Abolishing Death Irene Masing-Delic, 1992-11-01. The idea of abolishing death was one of the most influential myth-making concepts expressed in Russian literature from 1900 to 1930, especially in the works of writers who attributed a life-modeling function to art. To them, art was to create a life so aesthetically organized and perfect that

immortality would be an inevitable consequence This idea was mirrored in the thought of some who believed that the political revolution of 1917 would bring about a revolution in basic existential facts specifically the belief that communism and the accompanying advance of science would ultimately be able to bestow physical immortality and to resurrect the dead According to one variant for example the dead were to be resurrected by extrapolation from the traces of their labor left in the material world The author finds the seeds of this extraordinary concept in the erosion of traditional religion in late nineteenth century Russia Influenced by the new power of scientific inquiry humankind appropriated various divine attributes one after the other including omnipotence and omniscience but eventually even aiming toward the realization of individual physical immortality and thus aspiring to equality with God Writers as different as the decadent Fyodor Sologub the political Maxim Gorky and the gothic Nikolai Ogniov created works for making mortals into gods transforming the raw materials of current reality into legend The book first outlines the ideological context of the immortalization project notably the impact of the philosophers Fyodorov and Solovyov The remainder of the book consists of close readings of texts by Sologub Gorky Blok Ogniov and Zabolotsky Taken together the works yield the salvation program that tells people how to abolish death and live forever in an eternal self created cosmos gods of a legend that was made possible by creative artists imaginative scientists and inspired laborers
