Academy of Sciences the National Academy of Engineering was formed as a parallel organization of outstanding engineers. Members are elected on the basis of significant contributions to engineering theory and practice and to the literature of engineering or on the basis of demonstrated unusual accomplishments in the pioneering of new and developing fields of technology. The National Academies share a responsibility to advise the federal government on matters of science and technology. The expertise and credibility that the National Academy of Engineering brings to that task stem directly from the abilities, interests, and achievements of our members and foreign associates, our colleagues and friends whose special gifts we remember in this book.

*Aerosols* Pratim Biswas, Gregory Yablonsky, 2022-07-18. Aerosol science and engineering is a vibrant field of particle technology and chemical reaction engineering. *Computational Models for Polydisperse Particulate and Multiphase Systems* Daniele L. Marchisio, Rodney O. Fox, 2013-03-28. Providing a clear description of the theory of polydisperse multiphase flows with emphasis on the mesoscale modelling approach and its relationship with microscale and macroscale models, this all-inclusive introduction is ideal whether you are working in industry or academia. Theory is linked to practice through discussions of key real-world cases: particle droplet bubble coalescence, break-up, nucleation, advection, and diffusion, and physical and phase space, providing valuable experience in simulating systems that can be applied to your own applications. Practical cases of QMOM, DQMOM, CQMOM, EQMOM, and ECQMOM are also discussed and compared as are realizable finite volume methods. This provides the tools you need to use quadrature-based moment methods: choose from the many available options and design high-order numerical methods that guarantee realizable moment sets. In addition to the numerous practical examples, MATLAB scripts for several algorithms are also provided so you can apply the methods described to practical problems straight away.
