## **Sterilization Of People With Mental Disabilities Issues Perspectives And Cases:**

*Sterilization of People with Mental Disabilities* Ellen A Brantlinger, 1995-05-09 Brantlinger discusses the current medical and legal trends in sterilisation with special emphasis on people with disabilities She explores the issues surrounding sterilisation decisions from the perspectives of judges lawyers social workers doctors family planners as well as the families and individuals themselves She illustrates how ethical issues related to sterilisation are framed and which moral values are called upon during decision making She ends with guidelines for decision making **Beyond Testimony and Trauma**

Steven High, 2015-03-15 Survivors of terrible events are often portrayed as unsung heroes or tragic victims but rarely as complex human beings whose lives extend beyond the stories they have told *Beyond Testimony and Trauma* considers other ways to engage with survivors and their accounts based on insights gained from long term oral history projects in a variety of contexts including factory closures industrial injury eugenics and forced sterilization the Holocaust genocide in Rwanda and Cambodia Argentinian torture camps the Yugoslav Wars and Jewish emigration from the Maghreb The contributors all innovators in the field of oral history include Henry Greenspan who provides reflections from forty years of listening to Holocaust survivors as well as an insightful afterword They demonstrate that through deep listening long term relationship building and collaborative research design it is possible to move beyond the problematic aspects of testimony to shine light on the more nuanced lives of survivors of mass violence In the process they offer alternative approaches to the collection of oral history that will shake the foundations of current historiographical practice **Fixing the Poor** Molly

Ladd-Taylor, 2017-12-01 How state welfare politics not just concerns with race improvement led to eugenic sterilization practices Honorable Mention 2018 Outstanding Book Award The Disability History Association Shortlist 2019 Wallace K Ferguson Prize Canadian Historical Association Between 1907 and 1937 thirty two states legalized the sterilization of more than 63 000 Americans In *Fixing the Poor* Molly Ladd Taylor tells the story of these state run eugenic sterilization programs She focuses on one such program in Minnesota where surgical sterilization was legally voluntary and administered within a progressive child welfare system Tracing Minnesota's eugenics program from its conceptual origins in the 1880s to its official end in the 1970s Ladd Taylor argues that state sterilization policies reflected a wider variety of worldviews and political agendas than previously understood She describes how after 1920 people endorsed sterilization and its alternative institutionalization as the best way to aid dependent children without helping the undeserving poor She also sheds new light on how the policy gained acceptance and why coerced sterilizations persisted long after eugenics lost its prestige In Ladd Taylor's provocative study eugenic sterilization appears less like a deliberate effort to improve the gene pool than a complicated but sadly familiar tale of troubled families fiscal and administrative politics and deep felt cultural attitudes about disability dependency sexuality and gender Drawing on institutional and medical records court cases newspapers and professional journals Ladd Taylor reconstructs the tragic stories of the welfare dependent sexually delinquent and disabled

people who were labeled feeble-minded and targeted for sterilization. She chronicles the routine operation of Minnesota's three-step policy of eugenic commitment, institutionalization, and sterilization in the 1920s and 1930s and shows how surgery became the price of freedom from a state institution. Combining innovative political analysis with a compelling social history of those caught up in Minnesota's welfare system, *Fixing the Poor* is a powerful reinterpretation of eugenic sterilization.

Using archival sources, Ian Robert Dowbiggin documents the involvement of both American and Canadian psychiatrists in the eugenics movement of the early twentieth century. He explains why professional men and women committed to helping those less fortunate than themselves arrived at such morally and intellectually dubious conclusions. Psychiatrists at the end of the nineteenth century felt professionally vulnerable, Dowbiggin explains, because they were under intense pressure from state and provincial governments and from other physicians to reform their specialty. Eugenic ideas, which dominated public health policy, making seemed the best vehicle for catching up with the progress of science. Among the prominent psychiatrist-eugenicists Dowbiggin considers are G. Alder Blumer, Charles Kirk Clarke, Thomas Salmon, Clare Hincks, and William Partlow. Tracing psychiatric support for eugenics throughout the interwar years, Dowbiggin pays special attention to the role of psychiatrists in the fierce debates about immigration policy. His examination of psychiatry's unfortunate flirtation with eugenics elucidates how professional groups come to think and act along common lines within specific historical contexts. **Ellen A.
