Green, R. Meagher, T. Millon, 2012-12-06

We seek to throw down the gauntlet with this handbook challenging the hegemony of the behavioral medicine approach to the psychological study and treatment of the physically ill This volume is not another in that growing surfeit of texts that pledge allegiance to the doctrinaire purity of behavioristic thinking or conceptualize their subject in accord with the sterility of medical models Diseases are not our focus nor is the narrow band of behavioral assessment and therapy methodologies Rather we have sought to redefine this

amorphous yet burgeoning field so as to place it squarely within the province of a broadly based psychology specifically the emerging substantive discipline of health psychology and the well established professionalism and diverse technologies of clinical psychology The handbook's title Clinical Health Psychology reflects this reorientation explicitly and Chapter 1 addresses its themes and provides its justifications more fully In the process of developing a relevant and comprehensive health assessment tool the editors were struck by the failure of clinical psychologists to avail themselves of the rich vein of materials that comprise the psychosocial world of the physically ill Perhaps more dismaying was the observation that this field was being mined less than optimally by physicians and nonclinical psychologists *Handbook of Clinical Psychology, Volume 2* Michel Hersen, Alan M. Gross, 2008-02-13 Handbook of Clinical Psychology Volume 2 Children and Adolescents provides comprehensive coverage of the fundamentals of clinical psychological practice for the young from assessment through treatment including the innovations of the past decade in ethics cross cultural psychology psychoneuroimmunology cognitive behavioral treatment psychopharmacology and pediatric psychology **Handbook of Clinical Psychology**, 2008

Handbook of Clinical Psychology in Medical Settings Ronald H. Rozensky, Jerry J. Sweet, Steven M. Tovian, 2012-10-21 For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon's General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book
