Predicting the Future Nicholas Rescher, 1998-01-01 The future obviously matters to us It is after all where we ll be spending the rest of our lives We need some degree of foresight if we are to make effective plans for managing our affairs Much that we would like to know in advance cannot be predicted But a vast amount of successful prediction is nonetheless possible especially in the context of applied sciences such as medicine meteorology and engineering This book examines our prospects for finding out about the future in advance It addresses questions such as why prediction is possible in some areas and not others what sorts of methods and resources make successful prediction possible and what obstacles limit the predictive venture Nicholas Rescher develops a general theory of prediction that encompasses its fundamental principles methodology and practice and gives an overview of its promises and problems Predicting the Future considers the anthropological and historical background of the predictive enterprise It also examines the conceptual epistemic and ontological principles that set the stage for predictive efforts In short Rescher explores the basic features of the predictive situation and considers their broader implications in science in philosophy and in the management of our daily affairs *The Time Dimension* T K. Das, 1990-04-17 This is the first comprehensive bibliography of temporal scholarship research on the subject of time and the phenomenon of time itself As the author notes in his introduction the nature of research insights on the subject of time is difficult to comprehend within the confines of any specific discipline since relevant materials are scattered throughout the literature in numerous scholarly fields By bringing together the most significant published works in a wide variety of disciplines this unique compendium enables scholars and researchers to look beyond their own particular area of expertise when selecting appropriate resource materials Throughout the focus is on the time dimension itself as a problematic or researchable phenomenon rather than on narrow topics such as time management time series analysis or forecasting Organized by discipline the work begins with an initial chapter that lists general works on the time dimension Nineteen chapters then list works in particular disciplines ranging from anthropology and culture to biology economics

futures studies history linguistics management studies psychology and more The final chapter lists miscellaneous entries which could not be categorized into any of the specific disciplinary headings Within each chapter entries are arranged alphabetically by author or editor Nearly all sources are from scholarly journals and books Decision-Making in the Absense of Certainty , *The New Evolutionary Paradigm* Ervin Laszlo,2019-07-18 Originally published in 1991 The New Evolutionary Paradigm provides an innovative and cross disciplinary look at evolution While Darwin s theory of evolution was originally restricted to the life sciences in recent years the same principles have been applied successfully to historical social and natural sciences The papers included in The New Evolutionary Paradigm analyse the facts observations and accumulated data from the significance of a general evolution theory cannot be overemphasised a new understanding of the cosmos and man s relationship to it could lead to the systemization of the irreversible change that takes place in society and nature This book will appeal to scientists sociologists and those interested in transdisciplinary evolution theories Eternity and Eternal Life Tibor Horvath,2006-01-01 The Newtonian concept of time has been changed by Einsteinian insight Yet the Einsteinian world view might make it difficult to appreciate traditional concepts of eschatology like heaven and hell death and immortality life after death and resurrection last day and final judgments because these expressions presuppose a pre Einsteinian view of the universe Since theology cannot remain unaffected by the new research in concepts of time Eternity and Eternal Life tries to express the eschatological faith of the Church by using the time language of our age To achieve this it provides an overview on the research in the nature of time done in geology cosmology physics biology psychology sociology history and philosophy and proposes a notion of time for timely Christology and for timely eschatology By using the singularity event as literary form Horvath scrutinizes how Christ s time can lead to the times of all existing realities through death to eternity This is a pioneering work one that needs to be tested in the community of interested readers It is a communal search for an understanding of life death and eternal life not only in the light of abstract ideas and cultural linguistic doctrines in the world of religions but also in the light of science and especially of a person as the horizon of understanding for both time and eternity Christ as the eschatological union of time and eternity becomes the work s unifying focus and its paradigm which solves recognized problems and opens our minds to new ones
