The Knowledge Deficit Closing The Shocking Education Gap For American Children:

The Knowledge Deficit E. D. Hirsch, 2007-04-01 The Knowledge Deficit illuminates the real issue in education today without an effective curriculum American students are losing the global education race In this persuasive book the esteemed education critic activist and best selling author E D Hirsch Jr shows that although schools are teaching the mechanics of reading they fail to convey the knowledge needed for the more complex and essential skill of reading comprehension Hirsch corrects popular misconceptions about hot issues in education such as standardized testing and takes to task educators claims that they are powerless to overcome class differences Ultimately this essential book gives parents and teachers specific tools for enhancing children s abilities to fully understand what they read

The Knowledge Collapse Kevin B DiBacco, 2025-09-23 America faces a knowledge crisis that threatens democracy and daily life Only twenty six percent can name the three branches of government nearly half think antibiotics kill viruses and two thirds don t understand compound interest This isn t about intelligence but about practical knowledge needed for sound decisions and protection from manipulation The consequences are everywhere employers can t find skilled workers voters make uninformed decisions families fall for scams and democracy becomes vulnerable to those who exploit ignorance Communities lose the shared knowledge that enables cooperation and progress In *The Knowledge Collapse* Kevin B DiBacco exposes how misguided educational theories and cultural attitudes that celebrate ignorance have systematically dismantled America s knowledge base More importantly he provides practical strategies for individuals families and communities to rebuild these essential intellectual foundations This isn t another generational complaint but an urgent call to action backed by research and real solutions The knowledge collapse is measurable the solutions exist and the question is whether we ll act while there s still time to reverse this dangerous trend DiBacco is a filmmaker author and cultural observer who combines rigorous research with practical insights making complex social issues accessible to readers who want to be part of the solution

Seven Myths About Education Daisy Christodoulou, 2014-03-14 In this controversial new book Daisy Christodoulou offers a thought provoking critique of educational orthodoxy Drawing on her recent experience of teaching in challenging schools she shows through a wide range of examples and case studies just how much classroom practice contradicts basic scientific principles She examines seven widely held beliefs which are holding back pupils and teachers Facts prevent understanding Teacher led instruction is passive The 21st century fundamentally changes everything You can always just look it up We should teach transferable skills Projects and activities are the best way to learn Teaching knowledge is indoctrination In each accessible and engaging chapter Christodoulou sets out the theory of each myth considers its practical implications and shows the worrying prevalence of such practice Then she explains exactly why it is a myth with reference to the principles of modern cognitive science She builds a powerful case explaining how governments and educational organisations around the world have let down teachers and pupils by promoting and even mandating evidence less theory and bad practice This blisteringly

incisive and urgent text is essential reading for all teachers teacher training students policy makers head teachers researchers and academics around the world **The False Promise of Global Learning** Alex Standish,2012-05-31

Through the language of global learning education is being reformed by corporations political activists and policy makers Academic subject based knowledge has been cast as elitist and outdated for a rapidly changing world The curriculum has been colonized in the name of teaching skills and attitudes for the global market and global citizenship Can young people effectively contribute to society without an education in academic knowledge Alex Standish argues that we can only educate children about the world if we are clear about the boundaries that provide education with its moral worth These include the boundaries between education and political activity public and private realms education and training theoretical and everyday knowledge communities and subject disciplines The False Promise of Global Learning demonstrates that the nature and purpose of education has become confused with social economic political and therapeutic aims and that control over the curriculum has been taken away from teachers and communities This is a hard hitting work that will resonate with all who have a stake in how and why we educate our children *Navigating Through the Storm* Aharon Aviram,2010-01-01 This book aims to systematically tackle the most severe crisis to ever beset Western education systems which stems from the growing clash between the Platonic modern civilization still very much at the core of prevailing education systems and the postmodern civilization which has become dominant in Western societies in the last generations The book counters this crisis by radically and systematically rethinking education for postmodern democracies beginning by comprehensively analyzing the main features of current postmodern storms along with their engulfing socio cultural and educational implications and proceeding to offer a theoretical and practical blueprint designed to harness these storms for optimally realizing the basic Humanistic values that should guide education in liberal democracies personal autonomy morality and dialogical belonging

Hidden Dangers Betsy Gunzelmann,2012 The Hidden Dangers in our schools have grown and intensified over the last few years so much so that I was compelled to write a second edition to Hidden Dangers Subtle Signs of Failing Schools Our schools are complex places each with its own unique climate administration faculty students parents and community members Clearly schools do not work in a vacuum each is affected by the much larger society government and economy In this new edition we will be introduced to the interplay of these facets and how they can help and in some cases hinder our schools our teachers and our students from thriving We also learn why it is more complicated now than ever and the stakes are even higher than when Hidden Dangers was originally published back in 2008 **The State of the American Mind**

Mark Bauerlein,Adam Bellow,2015-05-22 In 1987 Allan Bloom s *The Closing of the American Mind* was published a wildly popular book that drew attention to the shift in American culture away from the tenants that made America and Americans unique Bloom focused on a breakdown in the American curriculum but many sensed that the issue affected more than education The very essence of what it meant to be an American was disappearing That was over twenty years ago Since then

the United States has experienced unprecedented wealth more youth enrolling in higher education than ever before and technology advancements far beyond what many in the 1980s dreamed possible And yet the state of the American mind seems to have deteriorated further Benjamin Franklin s self made man has become a man dependent on the state Independence has turned into self absorption Liberty has been curtailed in the defense of multiculturalism In order to fully grasp the underpinnings of this shift away from the self reliant well informed American editors Mark Bauerlein and Adam Bellow have brought together a group of cultural and educational experts to discuss the root causes of the decline of the American mind The writers of these fifteen original essays include E D Hirsch Nicholas Eberstadt and Dennis Prager as well as Daniel Dreisbach Gerald Graff Richard Arum Robert Whitaker David T Z Mindich Maggie Jackson Jean Twenge Jonathan Kay Ilya Somin Steve Wasserman Greg Lukianoff and R R Reno Their essays are compiled into three main categories States of Mind Indicators of Intellectual and Cognitive Decline These essays broach specific mental deficiencies among the population including lagging cultural IQ low Biblical literacy poor writing skills and over medication Personal and Cognitive Habits Interests These essays turn to specific mental behaviors and interests including avoidance of the news short attention spans narcissism and conspiracy obsessions National Consequences These essays examine broader trends affecting populations and institutions including rates of entitlement claims voting habits and a low performing higher education system The State of the American Mind is both an assessment of our current state as well as a warning foretelling what we may yet become For anyone interested in the intellectual fate of America The State of the American Mind offers an accessible and critical look at life in America and how our collective mind is faring

Education in Spite of Policy Robin

Alexander, 2021-12-30 A national system of education cannot function without policy But the path to practice is seldom smooth especially when ideology overrules evidence or when ministers seek to micromanage what is best left to teachers And once the media join the fray the mixture becomes downright combustible Drawing on his long experience as teacher researcher government adviser campaigner and international consultant and on over 600 published sources Robin Alexander expertly illustrates and illuminates these processes This selection from his recent writing some hitherto unpublished opens windows onto cases and issues that concern every teacher Part 1 tackles system level reform It revisits the Cambridge Primary Review an evidence rich enquiry into the condition and future of primary education in England which challenged the UK government s policies on curriculum testing standards and more besides Here the reform narratives and strategies of successive governments are confronted and dissected Part 2 follows the development of England s current National Curriculum exposing its narrow vision and questionable use of evidence and offering a more generous aims driven alternative This section also investigates the expertise and leadership needed if children are to experience a curriculum of the highest quality in all its aspects Part 3 reaches the heart of the matter securing the place in effective pedagogy of well founded classroom talk a mission repeatedly frustrated by political intervention The centrepiece is dialogic teaching a proven tool for

advancing students speaking thinking learning and arguing and an essential response to the corrosion of democracy and the nihilism of post truth Part 4 goes global It investigates governments PISA fuelled flirtations with what they think can be adapted or copied from education elsewhere examines the benefits and pitfalls of international comparison and ends with the ultimate policy initiative the United Nations mission to ensure inclusive and equitable quality education for all the world s children Education in Spite of Policy is for all those teachers students school leaders and researchers who value the conversation of policy evidence and practice and who wish to explore the parts of education that policy cannot reach
