The Guilty Environmentalist:

The Guilty Environmentalist Arthur O'Donnell, 2003 *The Guilty Environmentalist* is a collection of essays musings and political fantasies from award winning humorist and energy journalist Arthur O'Donnell Join the Guilty Environmentalist as he trips lightly through this exploration of the history and foibles of the electric utility industry from the very beginnings of the Age of Electricity to the aftermath of California's most recent energy crisis Selected from the best of the Bottom Lines columns carried in the nationally acclaimed California Energy Markets newsletter over the past decade *The Guilty Environmentalist* provides a unique and frequently hilarious perspective on a crucial industry that most people take for granted until the lights go out

The Skeptical Environmentalist Bjørn Lomborg, 2001-08-30 *The Skeptical Environmentalist* challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems *The Skeptical Environmentalist* offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media

The Environmentalist's Dilemma Arno Kopecky, 2021-10-19 For readers of Ronald Wright Rebecca Solnit and Yuval Noah Harari comes a compelling inquiry into our relationship with humanity's latest and greatest calamity In *The Environmentalist's Dilemma* award winning journalist Arno Kopecky zeroes in on the core predicament of our times the planet may be dying but humanity's doing better than ever To acknowledge both sides of this paradox is to enter a realm of difficult decisions Should we take down the government or try to change it from the inside Is it okay to compare climate change to Hitler Is hope naive or indispensable How do you tackle collective delusion Should we still have kids And can we take them to Disneyland Inquisitive and relatable Kopecky strikes a rare note of optimistic realism as he guides us through the moral minefields of our polarized world From start to finish *The Environmentalist's Dilemma* returns to the central question How should we engage with the story of our times

Northcott, Steven C. van den Heuvel, 2023-02-24 This volume focuses on fittingness as an ethical aesthetical idea and in particular examines how the concept is beneficial for environmental ethics It brings together an innovative set of contributions to argue that fittingness is a significant but under investigated facet of human ethical deliberation with both ethical and aesthetic dimensions In widely diverse matters from architecture to table manners individuals and communities make decisions based on fittingness also expressed in related

terms such as appropriateness prudence temperance and mutuality In the realm of environmental ethics fittingness denotes a relation between conscious embodied persons and their habitats and is of relevance to judgements about how humans shape and take up with the non human environment and hence to ethical decisions about the development and use of the environment and non human creatures As such fittingness can be of great benefit in reframing human relationships to the non human stimulating a way of living in the world that is fitting to the preservation of its fruitfulness goodness beauty and truth

The Reenchantment of Nature Alister McGrath,2002-09-17 In this provocative assessment of the world s current ecological crisis the author of the critically acclaimed In the Beginning exposes the false assumptions underlying the conflicts between science and religion and proposes an innovative approach to saving the planet Traditionally science and religion have been thought of as two distinct and irreconcilable ways of looking at the world and scientists have often chastised the world s religions for keeping their eyes on the heavens and paying scant attention to the destruction of Earth s precious resources and its natural wonders In The Reenchantment of Nature Alister McGrath who holds doctorates in both molecular biology and divinity challenges this long held and dangerously misguided dichotomy Arguing that Christianity and other great religions have always respected and revered the bounty and beauty of the earth McGrath calls for a radical shift in perspective He shows that by defining the world in the narrowest of scientific terms and viewing it as a collection of atoms and molecules governed by unchanging laws and forces we have lost our ability to appreciate nature s enchantments In order to address the threats to our environment he maintains it is essential to reawaken our sense of awe and look at the world as a glorious creation an irreplaceable gift of God In setting forth a new framework for the debate between science and religion on ecological theory The Reenchantment of Nature points the way to integrating two different traditions in a sane and productive effort to rescue the natural world from its present environmental decline
