Computer Vision Yoshiaki Shirai, 2012-12-06 The purpose of computer vision is to make computers capable of understanding environments from visual information Computer vision has been an interesting theme in the field of artificial intelligence It involves a variety of intelligent information processing both pattern processing for extraction of meaningful symbols from visual information and symbol processing for determining what the symbols represent The term 3D computer vision is used if visual information has to be interpreted as three dimensional scenes 3D computer vision is more challenging because objects are seen from limited directions and some objects are occluded by others In 1980 the author wrote a book *Computer Vision* in Japanese to introduce an interesting new approach to visual information processing developed so far Since then computer vision has made remarkable progress various rangefinders have become available new methods have been developed to obtain 3D information knowledge representation frameworks have been proposed geometric models which were developed in CAD CAM have been used for computer vision and so on The progress in computer vision technology has made it possible to understand more complex 3 D scenes There is an increasing demand for 3D computer vision In factories for example automatic assembly and inspection can be realized with fewer constraints than conventional ones which employ two dimensional computer vision Handbook Of Software Engineering And Knowledge Engineering, Vol 3: Recent Advances Shi-kuo Chang, 2005-08-25 The book covers the recent new advances in software engineering and knowledge engineering It is intended as a supplement to the two volume handbook of software engineering and knowledge engineering The editor and authors are well known international experts in their respective fields of expertise Each chapter in the book is entirely self contained and gives in depth information on a specific topic of current interest This book will be a useful desktop companion for both practitioners and students of software engineering and knowledge engineering Third NASA Goddard Conference on Mass Storage Systems and Technologies Ben Kobler, P.
