The High Frontier Gerard K. O'Neill, 1989 The High Frontier Gerard K. O'Neill, 1989 The High Frontier Gerard K. O'Neill, 2000 **The Visioneers** W. Patrick McCray, 2017-06-06 The story of the visionary scientists who invented the future In 1969 Princeton physicist Gerard O'Neill began looking outward to space colonies as the new frontier for humanity's expansion A decade later Eric Drexler an MIT trained engineer turned his attention to the molecular world as the place where society's future needs could be met using self-replicating nanoscale machines These modern utopians predicted that their technologies could transform society as humans mastered the ability to create new worlds undertook atomic scale engineering and if truly successful overcame their own biological limits The Visioneers tells the story of how these scientists and the communities they fostered imagined designed and popularized speculative technologies such as space colonies and nanotechnologies Patrick McCray traces how these visioneers blended countercultural ideals with hard science entrepreneurship libertarianism and unbridled optimism about the future He shows how they built networks that communicated their ideas to writers politicians and corporate leaders But the visioneers were not immune to failure or to the lures of profit celebrity and hype O'Neill and Drexler faced difficulty funding their work and overcoming colleagues' skepticism and saw their ideas co-opted and transformed by Timothy Leary the scriptwriters of Star Trek and many others Ultimately both men struggled to overcome stigma and ostracism as they tried to unshackle their visioneering from pejorative labels like fringe and pseudoscience The Visioneers provides a balanced look at the successes and pitfalls they encountered The book exposes the dangers of promotion oversimplification misuse and misunderstanding that can plague exploratory science But above all it highlights the importance of radical new ideas that inspire us to support cutting edge research into tomorrow's technologies **Provisional Cities** Renata Tysczuk, 2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re-position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities

A City on Mars Kelly Weinersmith, Zach Weinersmith, 2025-07-29 THE INSTANT NEW YORK TIMES BESTSELLER Winner of the Hugo Award Scientific American's 1 Book for 2023 Winner of Royal Society's Trivedi Prize A Guardian Best Book of 2024 A New York Times Book Review Editors Choice A Times Best Science and Environment Book of 2023 A Tor.com Best Book of 2023 Exceptional Forceful engaging and funny This book will make you happy to live on this planet a good thing because you're not leaving anytime soon New York Times Book Review From the bestselling authors of *Soonish* a brilliant and hilarious off-world investigation into space settlement EARTH IS NOT WELL The promise of starting life anew somewhere far far away no climate change no war no doomscrolling beckons and settling the stars nally seems within our grasp Or is it Critically acclaimed bestselling authors Kelly and Zach Weinersmith set out to write the essential guide to a glorious future of space settlements but after years of research they aren't so sure it's a good idea Space technologies and space businesses are progressing fast but we lack the knowledge needed to have space kids build space farms and create space nations in a way that doesn't spark conflict back home In a world hurtling toward human expansion into space *A City on Mars* investigates whether the dream of new worlds won't create nightmares both for settlers and the people they leave behind In the process the Weinersmiths answer every question about space you've ever wondered about and many you've never considered Can you make babies in space Should corporations govern space settlements What about space war Are we headed for a housing crisis on the Moon's Peaks of Eternal Light and what happens if you're left in the Craters of Eternal Darkness Why do astronauts love taco sauce Speaking of meals what's the legal status of space cannibalism With deep expertise a winning sense of humor and art from the beloved creator of Saturday Morning Breakfast Cereal the Weinersmiths investigate perhaps the biggest questions humanity will ever ask itself whether and how to become multiplanetary Get in we're going to Mars

Scramble for the Skies Namrata Goswami, Peter A. Garretson, 2020-10-06 With a focus on China the United States and India this book examines the economic ambitions of the second space race The authors argue that space ambitions are informed by a combination of factors including available resources capability elite preferences and talent pool The authors demonstrate how these influences affect the development of national space programs as well as policy and law

The Palgrave Handbook of Society, Culture and Outer Space James S. Ormrod, Peter Dickens, 2017-09-11 Societies have always been formed in a relationship with the rest of the universe With rapid developments in satellite communications and imaging space exploration and tourism military space technology and cosmology itself relationships with outer space are changing These changes have inspired a wave of critical academic work in recent years re-examining the history present and future of outer space and the place of humans within it This handbook provides an in-depth exploration of major themes relating to society culture and the universe and will inspire and cultivate debate in this exciting and burgeoning area of study for future researchers and theorists Bringing together scholarship from a range of disciplines including geography economics history political science sociology philosophy science and technology studies law cultural astronomy anthropology media

studies literature psychosocial studies and art it closely examines how outer space is socially produced experienced perceived and imagined and the significance of this for terrestrial social life Space Based Solar Power Fouad Sabry,2022-10-15 What Is Space Based Solar Power The notion of space based solar power refers to the gathering of solar energy in outer space by solar power satellites SPS and the subsequent transmission of that energy to Earth Outside of the atmosphere sunlight is able to shine for longer periods of time and is brighter overall Solar power systems that are stationed in space are able to transform sunlight into another kind of energy that is then able to be sent via the atmosphere to receivers located on the surface of the earth Those who are looking for answers on a massive scale to problems like anthropogenic climate change or the depletion of fossil fuels may find it appealing How You Will Benefit I Insights and validations about the following topics Chapter 1 Space based solar power Chapter 2 Spacecraft propulsion Chapter 3 Space colonization Chapter 4 Solar sail Chapter 5 Beam powered propulsion Chapter 6 Starwisp Chapter 7 Lightcraft Chapter 8 Rectenna Chapter 9 Laser propulsion Chapter 10 Wireless power transfer Chapter 11 Chang e 1 Chapter 12 Lunar space elevator Chapter 13 Project Echo Chapter 14 NASA Institute for Advanced Concepts Chapter 15 Lunar habitation Chapter 16 Thinned array curse Chapter 17 LADEE Chapter 18 Stationary High Altitude Relay Platform Chapter 19 Thermal rocket Chapter 20 Lunar Flashlight Chapter 21 Queqiao relay satellite II Answering the public top questions about space based solar power III Real world examples for the usage of space based solar power in many fields IV 17 appendices to explain briefly 266 emerging technologies in each industry to have 360 degree full understanding of space based solar power technologies Who This Book Is For Professionals undergraduate and graduate students enthusiasts hobbyists and those who want to go beyond basic knowledge or information for any kind of space based solar power *Human Migration to Space* Elizabeth Song Lockard,2014-05-13 Human migration to space will be the most profound catalyst for evolution in the history of humankind yet this has had little impact on determining our strategies for this next phase of exploration Habitation in space will require extensive technological interfaces between humans and their alien surroundings and how they are deployed will critically inform the processes of adaptation As humans begin to spend longer durations in space eventually establishing permanent outposts on other planets the scope of technological design considerations must expand beyond the meager requirements for survival to include issues not only of comfort and well being but also of engagement and negotiation with the new planetary environment that will be crucial to our longevity beyond Earth Approaching this question from an interdisciplinary approach this dissertation explores how the impact of interior space architecture can meet both the physical and psychological needs of future space colonists and set the stage for humankind to thrive and grow while setting down new roots beyond Earth
