humans and other animals portraying vividly the resulting ripples that change the lives of both animals and humans Noting
that we are all biologically members of one animal family she expertly weaves emergent understandings of animal and human
neurobiology showing that the ways in which other animals feel and think are actually similar to humans Love grief fear rage
sadness curiosity play these are shared by us all a key insight of affective neuroscience that informs Benvenuti s perceptions
of human animal relationships She effortlessly drops clues to understanding human motivation and behavior into her
narratives and points to ways in which we all other animals and humans alike must come up with creative responses to
problems such as climate change As we travel with her to both backyard and far flung locations we experience again and
again the surprising fact that other animals reach back to us with curiosity interest even care Benvenuti writes for the animal
