Secondary
Education 1918-65**

Michael Parkinson

The Labour Party The Organization Of Secondary Education 1918 65

John Lawson, Harold Silver

The Labour Party The Organization Of Secondary Education 1918 65:

The Labour Party and the Organization of Secondary Education 1918-65 Michael Parkinson, 2017-11-01 Originally published in 1970 Michael Parkinson examines the Labour Party's attitude towards secondary education in general and comprehensive schooling in particular and shows the effect of the party's philosophy on the question of education and its social importance The Labour Party is seen both as a policy maker with the power to implement policies and as a pressure group with power only to influence The case study provides valuable background reading to the controversies over comprehensive education at the time

The Labour Party and the Organization of Secondary Education 1918-65 Michael Parkinson, 1970 *Education and Labour Party Ideologies, 1900-2001 and Beyond* Denis Lawton, 2005 An analysis of the relationship between labour party values and beliefs and educational ideas since 1900

Consensus and Beyond Alan Warde, 1982 The Crisis of the Meritocracy Peter Mandler, 2020-09-11 Before the Second World War only about 20% of the population went to secondary school and barely 2% to university today everyone goes to secondary school and half of all young people go to university How did we get here from there The Crisis of the Meritocracy answers this question not by looking to politicians and educational reforms but to the revolution in attitudes and expectations amongst the post war British public the rights guaranteed by the welfare state the hope of a better life for one's children widespread upward mobility from manual to non manual occupations confidence in the importance of education in a learning society and a knowledge economy As a result of these transformations meritocracy the idea that a few should be selected to succeed has been challenged by democracy and its wider understandings of equal opportunity across the life course At a time when doubts have arisen about whether we need so many students and amidst calls for a return to grammar school selection at 11 the tension between meritocracy and democracy remains vital to understanding why our grandparents our parents ourselves and our children have sought and got more and more education and to what end

The Longman Companion to Britain in the Era of the Two World Wars 1914-45 Andrew Thorpe, 2014-09-19 In the momentous period barely 30 years covered by this systematic reference guide the Edwardian world was transformed unrecognisably through war technological progress and social change into the Nuclear Age It saw the coming of mass democracy the apogee of empire the Depression the threat of fascism the development of suburban society and as yet scarcely understood the end of Britain's international hegemony Andrew Thorpe's superb contribution to the Companions series illuminates all this and much else It will be indispensable to anyone interested in the history and politics of modern Britain

The Evolution of the Comprehensive School David Rubinstein, Brian Simon, 2013-04-15 Originally published 1969 This reprints the second edition of 1973 with updated reading list and bibliography This volume sets the movement towards comprehensive education against its historical background and discuss the main reasons for the decision to establish a national comprehensive system

A Social History of Education in England John Lawson, Harold Silver, 2013-10-28 Originally published in 1973 this book describes the medieval origins of

the British education system and the transformations successive historical events such as the Reformation the Civil War and the Industrial Revolution have wrought on it It examines the effect on the educational pattern of such major cultural upheavals as the Renaissance it looks at the different parts played by church and state and the influence of new social and educational philosophies *Urban Political Analysis* Professor Patrick Dunleavy,1980-01-01 Psychological socialism Jeremy Nuttall,2013-07-19 To Labour s first Prime Minister Ramsay MacDonald socialism meant not only satisfactory figures of death rates and improved houses but also the mental cleanliness the moral robustness of our people This book explores the neglected theme of individual character and mental qualities in British social democratic thought and Labour Party history How important was it for the centre left that citizens be good people What was the relationship between socialism and psychology in the 1930s Did Labour s technocratic statist socialism of the 1950s and 1960s downgrade moral and mental progress Why was the party often more concerned to produce a rationally planned economy than rational independent minded citizens Does New Labour represent a sidelining of ethical socialism or a re birth of the pre war left s belief in improvement through education and self control
