The Last Supper And Santa Maria Delle Grazie:

Leonardo Da Vinci, 1452-1519 Frank Zöllner, 2000 Life and work of the renowned painter scientist and philosopher of the Renaissance period *Leonardo Da Vinci* Eugène Müntz, 1898 **Leonardo da Vinci** Eugène Müntz, 2012-05-08 Leonardo's early life was spent in Florence his maturity in Milan and the last three years of his life in France Leonardo's teacher was Verrocchio First he was a goldsmith then a painter and sculptor as a painter representative of the very scientific school of draughtsmanship more famous as a sculptor being the creator of the Colleoni statue at Venice Leonardo was a man of striking physical attractiveness great charm of manner and conversation and mental accomplishment He was well grounded in the sciences and mathematics of the day as well as a gifted musician His skill in draughtsmanship was extraordinary shown by his numerous drawings as well as by his comparatively few paintings His skill of hand is at the service of most minute observation and analytical research into the character and structure of form Leonardo is the first in date of the great men who had the desire to create in a picture a kind of mystic unity brought about by the fusion of matter and spirit Now that the Primitives had concluded their experiments ceaselessly pursued during two centuries by the conquest of the methods of painting he was able to pronounce the words which served as a password to all later artists worthy of the name painting is a spiritual thing *cosa mentale* He completed Florentine draughtsmanship in applying to modelling by light and shade a sharp subtlety which his predecessors had used only to give greater precision to their contours This marvellous draughtsmanship this modelling and *chiaroscuro* he used not solely to paint the exterior appearance of the body but as no one before him had done to cast over it a reflection of the mystery of the inner life In the Mona Lisa and his other masterpieces he even used landscape not merely as a more or less picturesque decoration but as a sort of echo of that interior life and an element of a perfect harmony Relying on the still quite novel laws of perspective this doctor of scholastic wisdom who was at the same time an initiator of modern thought substituted for the discursive manner of the Primitives the principle of concentration which is the basis of classical art The picture is no longer presented to us as an almost fortuitous aggregate of details and episodes It is an organism in which all the elements lines and colours shadows and lights compose a subtle tracery converging on a spiritual a sensuous centre It was not with the external significance of objects but with their inward and spiritual significance that Leonardo was occupied **The Seventh Window** Wim de Groot, 2005-05-01 1997 was an important year for Sint Janskerk in Gouda as the Museo del Prado in Madrid asked to borrow the cartoon of the King's Window by Dirck Crabeth for the exhibition Felipe II Un principio del Renacimiento Inspired by this event it was decided to compile an anthology about the church's seventh window Based on the many faceted topic an international group of scholars from various disciplines studied the stained glass window in depth as a crucial presentation of Philip II's Netherlandish and English years An important step in current research into an enthralling era in European history of the sixteenth century
