Pencil Sketching From Nature (Classic Reprint) James Parton Haney,2016-10-01 Excerpt from Pencil Sketching From Nature From a study of these the student will be led to see that the successful sketch largely depends upon the development of satisfactory contrasts of light and dark Natural contrasts are emphasized and others are created at will by the draughtsman who seeks rather to suggest the planes of his drawing than to represent them in their true values Indeed the latter were impossible Pencil sketching is suggestive and not photographic Subtleties must perforce be ignored and contrasts often forced that simplicity may be secured while the illusion of solidity is created As the student has but few tones of black at his command he cannot hope to reproduce values as a painter reproduces them He must instead seek pleasing relations of light and shade and familiar ize himself with those devices which will enable him to suggest color and present attractive relations of sun light and shadow in his sketch About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any
