Masaryk,1990-06-18 A presentation of the work of the first President of Czechoslovakia who changed the course of history and influenced developments in Central Europe The selections of his work follow his dramatic career and show him as a philosopher and a politician who inspired practical work and thinking *The Spirit of Thomas G. Masaryk (1850-1937)* Tomáš Garrigue Masaryk,George J. Kovtun,1990 *Spirit of Thomas G. Masaryk (1850?1937)* George J. Kovtun,1990

World War I and the Birth of a New World Order Ioan Bolovan,Oana Mihaela Tămaş,2020-02-26 This volume will serve to enrich the reader s understanding of the impact of World War I on Eastern Europe by bringing together authors from all over Europe specialising in the history of this area It presents a retrospective approach and a re evaluation of this event the lasting effects of which still make themselves felt in some regions today Case studies memoirs journals and the printed press of the time are all examined in order to paint a vivid picture of the Great War in Eastern Europe and particularly in Romania The chapters offer fresh perspectives on topics connected to the war including the contribution of women and the emancipation opportunities for them the social changes that occurred and the propaganda in Romanian territory They also review the League of Nations and the protection of international minorities particularly in those regions where new boundaries were created and where the application of national self determination still left substantial communities outside the frontiers of the respective states *Recalling Masaryk's The Czech Question*

,2023-02-13 This book presents T G Masaryk s efforts to shape the identity of a small nation in late the 19th and early 20th century It features contributions from leading Czech scholars who analyse Masaryk s efforts 120 years later Masaryk is considered the most important figure in modern Czech history Drawing on the ideas of his ideological predecessors and humanists he wanted to integrate the Czech nation into the family of advanced world nations in line with international intellectual trends Masaryk was the first in world history to fulfil the Platonic ideal of a philosopher who founded a state

The United States in the First World War Anne Cipriano Venzon,2013-12-02 First Published in 1999 Includes six maps **Jan Hus** Jan Blahoslav Lášek,Angelo Shaun Franklin,2022-05-05 The Bohemian reformer Jan Hus made a substantial and critical contribution to the development of the medieval church owing especially to his views and teachings on Scripture the church faith conscience and spirituality This book offers a presentation of Hus s theological commitment centered on his understanding of truth Lek and Franklin explore Hus s preaching ministry and his long drawn out legal struggle against charges of heresy as ethical outworkings of this approach to truth Central to this exploration is a new annotated translation of Hus s Appeal to Jesus Christ as the Supreme Judge against the pope and canon law This document was not only a protest against papal power but expressed a fundamentally new legal situation in bypassing canon law it essentially represented a personal claim to freedom of conscience This unheard of principle from within the medieval legal framework preceded other related ecclesiastical and legal developments by several centuries The authors argue that Hus s

appeal thus represents a momentous event in church history and European history as a whole Due to the historical significance of his martyrdom and commemoration by many churches throughout Europe this book demonstrates that Hus remains an important figure not only for the study of European history but also for understanding contemporary values of Western civilization

Defining the Sovereign Community Nadya Nedelsky, 2012-02-28 Though they shared a state for most of the twentieth century when the Czechs and Slovaks split in 1993 they founded their new states on different definitions of sovereignty The Czech Constitution employs a civic model founding the state in the name of the citizens of the Czech Republic while the Slovak Constitution uses the more exclusive ethnic model and speaks in the voice of the Slovak Nation *Defining the Sovereign Community* asks two central questions First why did the two states define sovereignty so differently Second what impact have these choices had on individual and minority rights and participation in the two states Nadya Nedelsky examines how the Czechs and Slovaks understood nationhood over the course of a century and a half and finds that their views have been remarkably resilient over time These enduring perspectives on nationhood shaped how the two states defined sovereignty after the Velvet Revolution which in turn strongly affected the status of the Hungarian minority in Slovakia and the Roma minority in the Czech Republic Neither state has secured civic equality but the nature of the discrimination against minorities differs Using the civic definition of sovereignty offers stronger support for civil and minority rights than an ethnic model does Nedelsky's conclusions challenge much analysis of the region which tends to explain ethnic politics by focusing on postcommunist factors especially the role of opportunistic political leaders *Defining the Sovereign Community* instead examines the undervalued historical roots of political culture and the role of current constitutional definitions of sovereignty Looking ahead Nedelsky offers crucial evidence that nationalism may remain strong in Slovakia and the Czech Republic even in the face of democratization and EU integration and is an important threat to both

The First World War Antonello Biagini, 2015-11-25 This volume is the result of an international conference held at Sapienza University of Rome in June 2014 which brought together scholars from different countries to re analyse and re interpret the events of the First World War one hundred years after a young Bosnian Serb student from the Mlada Bosna Gavrilo Princip lit the fuse and ignited the conflict which was to forever change the world The Great War initially on a European and then on a world scale

demonstrated the fragility of the international system of the European balance of powers and determined the dissolution of the great multinational empires and the need to redraw the map of Europe according to the principles of national sovereignty. This book provides new insights into theories of this conflict and is characterized by internationality, interdisciplinarity, and a combination of different research methods. The contributions, based on archival documents from various different countries, international and local historiography, and on the analysis of newspaper articles, postcards, propaganda material, memorials, and school books, examine the role of intellectuals and artists in the conflict, the issue of minorities and nationalities, the economy and international relations and politics, in addition to specific case studies such as Russia and the Ottoman Empire, the Caucasus, and the Middle East.
