Integer Programming and Combinatorial Optimization Friedrich Eisenbrand, Bruce Shepherd, 2010-06-09 The idea of a refereed conference for the mathematical programming community was proposed by Ravi Kannan and William Pulleyblank to the Mathematical Programming Society MPS in the late 1980s. Thus IPCO was born and MPS has sponsored the conference as one of its main events since IPCO I at the University of Waterloo in 1990. The conference has become the main forum for recent results in Integer Programming and Combinatorial Optimization in the non Symposium years. This volume compiles the papers presented at IPCO XIV held June 9-11 2010 at EPFL in Lausanne. The scope of papers considered for IPCO XIV is likely broader than at IPCO I. This is sometimes due to the wealth of new questions and directions brought from related areas. It can also be due to the successful application of math programming techniques to models not traditionally considered. In any case the interest in IPCO is greater than ever and this is reflected in both the number 135 and quality of the submissions. The Programme Committee with 13 members was also IPCO's largest. We thank the members of the committee as well as their sub-reviewers for their exceptional and time-consuming work and especially during the online committee meeting held over January. The process resulted in the selection of 34 excellent research papers which were presented in non-parallel sessions over three days in Lausanne. Unavoidably this has meant that many excellent submissions were not able to be included.

Proceedings of the Ninth Annual ACM-SIAM Symposium on Discrete Algorithms Howard Karloff, 1998-01-01 This symposium is jointly sponsored by the ACM Special Interest Group on Algorithms and Computation Theory and the SIAM Activity Group on Discrete Mathematics. [Interactive Theorem Proving](#) Jeremy Avigad, Assia Mahboubi, 2018-07-03 This book constitutes the refereed proceedings of the 9th International Conference on Interactive Theorem Proving ITP 2018 held in Oxford UK in July 2018. The 32 full papers and 5 short papers presented were carefully reviewed and selected from 65 submissions. The papers feature research in the area of logical frameworks and interactive proof assistants. The topics include theoretical foundations and implementation aspects of the technology as well as applications to verifying hardware and software systems to ensure their safety and security and applications to the formal verification of mathematical results. Chapters 2, 10, 26, 29, 30, and 37 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

When Christ's Body Is Broken Leanna K. Fuller,2016-03-03 When Christ s Body Is Broken tells the stories of two congregations in conflict Although these churches had very different problems they faced similar struggles to articulate a faithful response to their concerns and to cope with the discord that threatened to tear their communities apart Pastoral theologian Leanna K Fuller shares these stories as a way of exploring the sources and dynamics of conflict in congregations She argues that at the heart of such conflict lies anxiety triggered by encounters with difference Bringing together resources from pastoral theology psychodynamic theory and social psychology Fuller offers a theological reframing of conflict through categories of diversity vulnerability and hospitality categories that she argues can encourage human beings to sit with the anxiety stirred by communal life and remain connected across differences This reframing provides fertile ground out of which Fuller imagines concrete practices designed for conflicted communities and their leaders *Die Margarine Heute* Guy Clement,
