Spoken Multilingual And Multimodal Dialogue Systems Development And Assessment:

Spoken, Multilingual and Multimodal Dialogue Systems Ramon Lopez Cozar Delgado, Masahiro Araki, 2007-01-11

Dialogue systems are a very appealing technology with an extraordinary future. *Spoken Multilingual and Multimodal Dialogues Systems Development and Assessment* addresses the great demand for information about the development of advanced dialogue systems combining speech with other modalities under a multilingual framework. It aims to give a systematic overview of dialogue systems and recent advances in the practical application of spoken dialogue systems. Spoken Dialogue Systems are computer based systems developed to provide information and carry out simple tasks using speech as the interaction mode. Examples include travel information and reservation, weather forecast information, directory information and product order. Multimodal Dialogue Systems aim to overcome the limitations of spoken dialogue systems which use speech as the only communication means while Multilingual Systems allow interaction with users that speak different languages. Presents a clear snapshot of the structure of a standard dialogue system by addressing its key components in the context of multilingual and multimodal interaction and the assessment of spoken multilingual and multimodal systems. In addition to the fundamentals of the technologies employed, the development and evaluation of these systems are described. Highlights recent advances in the practical application of spoken dialogue systems. This comprehensive overview is a must for graduate students and academics in the fields of speech recognition, speech synthesis, speech processing, language and human computer interaction technology. It will also prove to be a valuable resource to system developers working in these areas.

Spoken Dialogue Systems Technology and Design Wolfgang Minker, Gary Geunbae Lee, Satoshi

Nakamura, Joseph Mariani, 2010-11-09. *Spoken Dialogue Systems Technology and Design* covers key topics in the field of spoken language dialogue interaction from a variety of leading researchers. It brings together several perspectives in the areas of corpus annotation and analysis, dialogue system construction as well as theoretical perspectives on communicative intention, context based generation and modelling of discourse structure. These topics are all part of the general research and development within the area of discourse and dialogue with an emphasis on dialogue systems, corpora and corpus tools and semantic and pragmatic modelling of discourse and dialogue.

Large-Scale Knowledge Resources. Construction and Application Takenobu Tokunaga, Antonio

Ortega, 2008-02-29. At the start of the 21st century we are now well on the way towards a knowledge intensive society in which knowledge plays ever more important roles. Thus research interest should inevitably shift from information to knowledge with the problems of building, organizing, maintaining and utilizing knowledge coming central issues in a wide variety of fields. The 21st Century COE program Framework for Systematization and Application of Large scale Knowledge sources COE LKR

conducted by the Tokyo Institute of Technology is one of several early attempts worldwide to address these important issues Inspired by this project LKR2008 aimed at bringing together diverse contributions in cognitive science computer science education and linguistics to explore design construction extension maintenance validation and application of knowledge Responding to our call for papers were received 38 submission from a variety of research areas

Each paper was reviewed by three Program Committee members Since we were aiming at an interdisciplinary conference covering a wide range of topics concerning large scale knowledge resources LKR each paper was assigned a reviewer from a topic area outside the main thrust of the paper This reviewer was asked to assess whether the authors described the motivation and importance of their work in a comprehensible manner even for readers in other research areas Following a rigorous reviewing process we accepted 14 regular papers and 12 poster papers
