The History And Philosophy Of Art Education:

The History and Philosophy of Art Education Stuart Macdonald, 2004 Investigating the study of art and design education in Italy France Britain Germany and the United States this text traces the philosophies of teachers from the age of the guilds and the academies setting them in the context of the general education theories of their times The History and Philosophy of Art Education Stuart Macdonald, 1970 *The History and Philosophy of Art Education* Stuart Macdonald (Ph. D.), 1970 **A History of Art Education** Arthur D. Efland, 1990 Arthur Efland puts current debate and concerns in a well researched historical perspective He examines the institutional settings of art education throughout Western history the social forces that have shaped it and the evolution and impact of alternate streams of influence on present practice A History of Art Education is the first book to treat the visual arts in relation to developments in general education Particular emphasis is placed on the 19th and 20th centuries and on the social context that has affected our concept of art today This book will be useful as a main text in history of art education courses as a supplemental text in courses in art education methods and history of education and as a valuable resource for students professors and researchers The book should become a standard reference tool for art educators at all levels of the field The Journal of Aesthetics and Art Criticism Efland has filled a gap in historical research on art education and made an important contribution to scholarship in the field Studies in Art Education

A History of Disability and Art Education Claire Penketh, 2023-08-16 Drawing on recent theoretical frameworks from critical disability studies and art education including normalcy ableism disability and Crip theory this book offers an analysis of the conceptualisation of ability in art education and its relationship with disability Drawing on the work of Cizek and Lowenfeld in Austria Ruskin and Richardson in England and Dewey and Eisner in the United States it critically examines the influence of ideas such as the dominance of vision and visuality the emergence of psychological perspectives the Child Art Movement the implications of assessment regimes and the relevance of art education as a critical social practice on the production of disability Offering a sustained inquiry into the differential values attributed to learners and their work and the implications of this for framing our understanding of disability in art education this book shows that although art educators have frequently advocated for the universal appeal and importance of art education they have done so within historical contexts that have produced and determined problematic ideas regarding disability It will be of interest to all scholars and students of disability studies art in education art history and education studies *Handbook of Research and Policy in Art Education* Elliot W. Eisner, Michael D. Day, 2004-04-12 The Handbook of Research and Policy in Art Education marks a milestone in the field of art education Sponsored by the National Art Education Association and assembled by an internationally known group of art educators this 36 chapter handbook provides an overview of the remarkable progress that has characterized this field in recent decades Organized into six sections it profiles and integrates the following elements of this rapidly emerging field history policy learning curriculum and instruction assessment and competing perspectives

Because the scholarly foundations of art education are relatively new and loosely coupled this handbook provides researchers students and policymakers both inside and outside the field an invaluable snapshot of its current boundaries and rapidly growing content In a nutshell it provides much needed definition and intellectual respectability to a field that as recently as 1960 was more firmly rooted in the world of arts and crafts than in scholarly research *Curriculum, Culture, and Art Education* Kerry Freedman, Fernando Hernández-Hernández, 2024-09-01 Through international case studies this book explores the causes and effects of historical and contemporary cultural changes in art education A general broadening of content and methods a renewed emphasis on student interests and diverse critical perspectives can currently be seen internationally in art curricula This book explores ways that visual culture in education is helping to move art curricula off their historical foundations and open the field to new ways of teaching learning and prefiguring worlds It highlights critical histories and contemporary stories showing how cultural milieu influences and is influenced by the various practices that make up the professional field inside and outside of institutional borders This book shows students how contemporary art educators are responding revising and re creating the field **Philosophy of Art Education** Edmund Burke Feldman, 1996 The primary aim of the book is to raise the questions and issues which should be of importance to art teachers by relating the practices and concerns of art teaching to some of the main problems of philosophy It integrates both subjects of art education and art teaching presents many of the principle issues regarding art education that are of concern to art teachers and provides future and current teachers of art with a means of reflecting on the reasons and goals for teaching art

Joseph Beuys and the Artistic Education Carl-Peter Buschkühle, 2020-03-23 Joseph Beuys significantly influenced the development of art in recent decades through his expanded definition of art In his art and reflections on art he raised far reaching questions on the nature of art and its central importance for modern education His famous claim Every human is an artist points to the fundamental ability of every human to be creative in the art of life with respect to the development of one s own personality and one s actions within society Beuys saw society as an artwork in a permanent process of transformation a social sculpture in which every person participated and for which everyone should be educated as comprehensively as possible Beuys describes pedagogy as central to his art This book thus examines important aspects of Beuys s art and theory and the challenges they raise for contemporary artistic education It outlines the foundational theoretical qualities of artistic education and discusses the practice of artistic projects in a series of empirical examples The author Carl Peter Buschkühle documents projects he has undertaken with various high school classes In additional chapters Mario Urla discusses the great value of artistic projects in primary school and Christian Wagner reflects on his collaboration with the performance artist Wolfgang Sautermeister and school students in a socially disadvantaged urban area Artistic education has become one of the most influential art pedagogical concepts in German speaking countries This book presents its foundations and educational practices in English for the first time *The Studios of Frances and Margaret Macdonald* Janice Helland, 1996
