

A Brief History of Whaling

EARLY HUNTING

3000 BCE: Whaling was practiced by Inuit peoples and others in the North Atlantic and North Pacific oceans.

1000 BCE: The Basques caught northern right whales that gathered to breed in the Bay of Biscay.

17TH CENTURY:

Smeerenburg ("Blubbervtown") was built on Spitsbergen after 1619. During its heyday in the 1630s and '40s, the settlement had 150 men servicing whalers that hunted the whales in the surrounding Arctic Ocean.

Arctic bay whaling ended in the mid-1650s because of the onset of a miniature ice age that lasted for the rest of the 17th century.

1850s:

The quarry of slow-moving 1850s-era vessels was sperm whales (*Physeter catodon*) and right whales (family *Balaenidae*, four species).

MODERN ERA

1950s TO 1980s:

Larger 1950s-era vessels allowed for greater range as well as the capability to process hunted whales at sea.

Floating factories made it possible to process a 100-ton blue whale (*Balaenoptera musculus*) in one hour.

Carcasses were winched up onto an open butchering deck via a slipway through the stern.

Modern vessels were equipped with helicopters and diesel engines, which allowed whalers to locate and overtake faster quarry.

THE PRESENT:

Minke whales (*Balaenoptera acutorostrata* and *B. bonaerensis*) are frequently listed as the quarry of Iceland, Norway, and Japan—the last remaining whaling countries—for food and research. Nearly 200 minke whales per year are harvested by aboriginal peoples in Greenland.

Isenberg, 2017 The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field *Year Book of International Co-operation on Environment and Development* Helge Ole Bergesen, Georg Parmann, Øystein B. Thommessen, 2018-12-07 This eighth annual edition analyzes the international community's position on specific environment and development problems the main obstacles to effective international solutions and how to overcome them It assesses both the achievements and shortcomings of co operation distinguishing between the rhetoric and the reality of environmental world politics **The Game of Conservation** Mark Cioc, 2009-11-15 The Game of Conservation is a brilliantly crafted and highly readable examination of nature protection around the world Twentieth century nature conservation treaties often originated as attempts to regulate the pace of killing rather than as attempts to protect animal habitat Some were prompted by major breakthroughs in firearm techniques such as the invention of the elephant gun and grenade harpoons but agricultural development was at least as important as hunting regulations in determining the fate of migratory species The treaties had many defects yet they also served the goal of conservation to good effect often saving key species from complete extermination and sometimes keeping the population numbers at viable levels It is because of these treaties that Africa is dotted with large national parks that North America has an extensive network of bird refuges and that there are any whales left in the oceans All of these treaties are still in effect today and all continue to

influence nature protection efforts around the globe Drawing on a wide variety of primary and secondary sources Mark Cioc shows that a handful of treaties all designed to protect the world s most commercially important migratory species have largely shaped the contours of global nature conservation over the past century The scope of the book ranges from the African savannahs and the skies of North America to the frigid waters of the Antarctic
