The Hot Blooded Dinosaurs A Revolution In Palaeontology:

The Hot-blooded Dinosaurs Adrian J. Desmond,1977 **The Hot-Blooded Dinosaurs** Adrian J. Desmond,1976-04-01
Draws upon recent discoveries and research to recount the rise and fall of the dinosaurs as dominant warm blooded animals and to reassess their intelligence agility physiological complexity and advanced social behavior **The Hot-blooded Dinosaurs** Adrian Desmond,1990-01-01 **The Paleobiological Revolution** David Sepkoski,Michael Ruse,2015-03-04 The Paleobiological Revolution chronicles the incredible ascendance of the once maligned science of paleontology to the vanguard of a field With the establishment of the modern synthesis in the 1940s and the pioneering work of George Gaylord Simpson Ernst Mayr and Theodosius Dobzhansky as well as the subsequent efforts of Stephen Jay Gould David Raup and James Valentine paleontology became embedded in biology and emerged as paleobiology a first rate discipline central to evolutionary studies Pairing contributions from some of the leading actors of the transformation with overviews from historians and philosophers of science the essays here capture the excitement of the seismic changes in the discipline In so doing David Sepkoski and Michael Ruse harness the energy of the past to call for further study of the conceptual development of modern paleobiology **Ways of Knowing** John V. Pickstone,2000 This classic MUP text discusses the historical development of science technology and medicine in Western Europe and North America from the Renaissance to the present Combining theoretical discussion and empirical illustration it redefines the geography of science technology and medicine **Thomas Hardy and the Survivals of Time** Andrew Radford,2017-03-02 A systematic exploration of Thomas Hardy s imaginative assimilation of particular Victorian sciences this study draws on and swells the widening current of scholarly attention now being paid to the cultural meanings compacted and released by the nascent sciences of man in the nineteenth century Andrew Radford here situates Hardy s fiction and poetry in a context of the new sciences of humankind that evolved during the Victorian age to accommodate an immense range of literal and figurative excavations then taking place Combining literary close readings with broad historical analyses he explores Hardy s artistic response to geological archaeological and anthropological findings In particular he analyzes Hardy s lifelong fascination with the doctrine of survivals a term coined by E B Tylor in Primitive Culture 1871 to denote customs beliefs and practices persisting in isolation from their original cultural context Radford reveals how Hardy s subtle reworking of Tylor s doctrine offers a valuable insight into the inter penetration of science and literature during this period An important aspect of Radford s research focuses on lesser known periodical literature that grew out of a British amateur antiquarian tradition of the nineteenth century His readings of Hardy s literary notebooks disclose the degree to which Hardy s own considerable scientific knowledge was shaped by the middlebrow periodical press Thus Thomas Hardy and the Survivals of Time raises questions not only about the reception of scientific ideas but also the creation of nonspecialist forms of scientific discourse This book represents a genuinely new perspective for Hardy studies [The Complete Dinosaur](#) James Orville Farlow,M.
