The Japanese Enterprise System W. Mark Fruin,1992 This volume merges four streams of inquiry and interpretation in a study of the evolution and emergence of Japan s leading industrial firms during the twentieth century First it is a historical study of how the industrial institutions of modern Japan appeared and matured Second it is an organization study of the basic forms of social and economic interaction in Japan Third it is a development study of how circumstances of rapid technical and economic change have shaped the Japanese business system It is also a strategy study of how Japanese managers have responded to and shaped these circumstances This fourfold synthesis offers a model of institutional development under conditions of late economic development and private initiative that falls somewhere between a capitalist development state and a free market economy Business policy rather than industrial policy is accentuated revealing a set of robust institutions and a dynamic to activate and interrelate them The Japanese Industrial System Charles J.
