Pickren, Donald A. Dewsbury, Michael Wertheimer, 2012-05-04 Utilizing an informal sometimes humorous style of writing this book brings to life 16 developmental psychologists who made a significant contribution to their field Written by noted scholars each chapter provides a glimpse into the personal and scholarly lives of these innovative pioneers Some of the chapters are based on the contributor's personal acquaintance with a pioneer allowing for the introduction of previously unavailable information Suggested Readings allow readers to delve deeper into the material and a tabular list of subjects and authors helps instructors supplement their courses in substantive areas of psychology with ease The introductory essay prepares the reader for a deeper understanding of the contributions of each of the pioneers Mamie Phipps Clark had a

profound impact on the education of American children Robert W White pioneered a new approach to the study of persons across the lifespan Lois Barclay Murphy's perspective on the strengths of developing children foreshadowed later developments in positive psychology Florence Goodenough pioneered new testing methods for children John Paul Scott was a pioneer in the field of behavior genetics The book also highlights the many contributions of European pioneers Jean Piaget Charlotte B. Hler Heinz Werner and Lev Vygotsky Their contributions were carried forward by J. McVicker Hunt in the U.S. and Helena Antipoff in Brazil Arnold Gesell's film studies of children's development remain a landmark accomplishment Lawrence Kohlberg pioneered the study of moral development across the lifespan Roger Barker's studies on aggression and leadership among children eventually led to the development of ecological psychology Eleanor Jackie Gibson was famous for her work on the visual cliff and for her research on perception and development Finally Sidney Bijou had a long career delineating ways to improve the lives of children Pickren's concluding essay draws connections between the pioneers and how they contributed to the advancement of the field Intended as a supplementary text for undergraduate and/or graduate courses in the history of psychology and/or developmental child or lifespan psychology taught in psychology education and human development this engaging book also appeals to those interested in and/or teaching these subject areas Each of the 7 volumes in the Portraits of Pioneers Series contain different profiles bringing more than 140 of psychology's pioneers to life

Child Psychology in Retrospect and Prospect Willard W. Hartup, Richard A. Weinberg, 2014-02-25 This 32nd volume of the Minnesota Symposium on Child Psychology celebrates the 75th anniversary of the University of Minnesota's Institute of Child Development All eight essays are devoted to developmental science its history and current status Taken together the chapters in this book show how the history of science connects past and future how it gives the individual investigator an identity and sense of purpose how contemporary studies occur within larger traditions and how institutions like the Institute of Child Development constitute cultural traditions of their own Collectively these essays show that the past explains a great deal whether we want to know about the processes through which the child acquires symbolic thought or whether we want to know how and why during the last century a few enduring centers were established for the scientific study of children and adolescents Reading these essays one obtains a sense of how the past becomes evidence how it forms models for the way we think and how intellectual challenges arise *Review of Child Development Research* Lois Wladis Hoffman, Martin L. Hoffman, 1964-12-31 Makes a major contribution to current research on children by providing a broad view of up-to-date authoritative material in many different areas Contributors have selected and interpreted the relevant material in reference to the practitioner's interests and needs The chapters written by prominent specialists cover various topics in child development from early periods of socialization to the development of higher mental processes and include two chapters dealing with genetic and neurophysiological bases of behavior **THE INFLUENCE OF SPECIFIC EXPERIENCES ON CHILDREN'S CONCEPTS OF CAUSAL RELATIONS.** MALCOLM JAMES WILLIAMS, 1940
