The History Of Home:

Stars in the History of Home Economics in Egypt 1937-1980 Aly R Abdel-Moemin, Manal K Abdel-Rahman, 2019-03-21

This is the first book telling the history of Egyptian pioneers in home economics from 1937-1980. Authors focused on this period of history because it was the golden time for HE in Egypt and was the time that the name of HE lasts. The information in this book is not only for home economics specialists but also for people interested in the history of early female education in twentieth century in Egypt. It contains rare pictures, books written by the pioneers, and biographies for pioneers of HE published for the first time. The book shows how home economics education developed the type of education they get in the UK, France, Switzerland, famous pioneers, their books, awards, and graduation parties in the mid twentieth century. It also outlines their roles in the community, FAO, UNESCO, the situation of HE in 2018, Domestic Science, and Embroidery Arts, biographies, and rare pictures. We have spent 3 years collecting information, pictures, interviewing live pioneers or their daughters, and researched in old sections of libraries to write this history. In addition to the publishing of this book, a free private museum has been developed based on data collected for this book and built on 165m, which was the first museum for pioneers of home economists in Egypt and Arab countries and also internationally based on the private work that we have done. The museum has 100 framed pictures of pioneers in addition to their rare books. These are not available in any library but have been collected from relatives of late pioneers. *The Secret History of Home Economics* Danielle

Dreilinger, 2021-05-04. Deeply researched and crisply written. Margaret Talbot, *The New Yorker*. The surprising, often fiercely feminist, always fascinating, yet barely known history of home economics. The term home economics may conjure traumatic memories of lopsided hand-sewn pillows or sunken muffins. But common conception obscures the story of the revolutionary science of better living. The field exploded opportunities for women in the twentieth century by reducing domestic work and providing jobs as professors, engineers, chemists, and businesspeople. And it has something to teach us today. In the surprising, often fiercely feminist, and always fascinating *The Secret History of Home Economics*, Danielle Dreilinger traces the field's history from Black colleges to Eleanor Roosevelt to Okinawa, from a Betty Crocker brigade to DIY techies. These women, and they were mostly women, became chemists and marketers, studied nutrition, health, and exercise, tested parachutes, created astronaut food, and took bold steps in childhood development and education. Home economics followed the currents of American culture even as it shaped them. Dreilinger brings forward the racism within the movement along with the strides taken by women of color who were influential leaders and innovators. She also looks at the personal lives of home economics women as they chose to be single, share lives with other women, or try for egalitarian marriages. This groundbreaking and engaging history restores a denigrated subject to its rightful importance as it reminds us that everyone should learn how to cook a meal, balance their account, and fight for a better world. **The History of the Home in Colonial America and in the United States**
